Editing the Soul Everett Hamner,2017-10-02 Personal genome testing gene editing for life threatening diseases synthetic life once the stuff of science fiction twentieth and twenty first century advancements blur the lines between scientific narrative and scientific fact This examination of bioengineering in popular and literary culture shows that the influence of science on science fiction is more reciprocal than we might expect Looking closely at the work of Margaret

Atwood Richard Powers and other authors as well as at film comics and serial television such as Orphan Black Everett Hamner shows how the genome age is transforming both the most commercial and the most sophisticated stories we tell about the core of human personhood As sublime technologies garner public awareness beyond the genre fiction shelves they inspire new literary categories like slipstream and shape new definitions of the human the animal the natural and the artificial In turn what we learn of bioengineering via popular and literary culture prepares the way for its official adoption or restriction and for additional representations By imagining the connections between emergent gene testing and editing capacities and long standing conversations about freedom and determinism these stories help build a cultural zeitgeist with a sharper more balanced vision of predisposed agency A compelling exploration of the interrelationships among science popular culture and self Editing the Soul sheds vital light on what the genome age means to us and what s to come
