Genius Wars Msk:

Diagnosing Genius François Martin Mai, 2007-02-09 Mai's experience as a physician and psychiatrist serves as a basis for his analysis. Working from the symptoms described in the medical evidence, Beethoven's letters and those of his friends and the reports of his physicians, Mai compares how Beethoven's health complaints would have been understood and treated within the medical, political, and social climate of both his time and ours. He discusses Beethoven's terminal illness and the resulting autopsy report to consider the roles of alcohol, lead poisoning based on the toxic levels in his hair, and syphilis in causing his death.

The primary objective is to examine Norway as a case that may serve to illuminate some general problems of European state formation in the period, problems related both to the formation of the European system of independent kingdoms within a common cultural framework and to the inner development of these kingdoms. The volume furthermore examines the changes that took place in the military, social, economical, ideological, legal, and administrative fields between the first formation of the kingdom and the early fourteenth century, which, according to
