Geographynd Paper 24:

Geography and Geographers Ron Johnston, James Sidaway, 2015-12-22 Explores the relationship between human and physical geography All chapters updated in the new edition to reflect new literature and changes in the discipline Chapter One systematically considers representations of geographical thought The closing chapter develops an explicit argument about what has made human geography distinctive Draws on a wide reading of the geographical literature produced during a fifty year period characterised by both growth in the number of academic geographers and substantial shifts in conceptions of the discipline s scientific rationale

Creative Methods for Human Geographers Nadia von Benzon, Mark Holton, Catherine Wilkinson, Samantha Wilkinson, 2021-01-13 Introducing a broad range of innovative and creative qualitative methods this accessible book shows you how to use them in research project while providing straightforward advice on how to approach every step of the process from planning and organisation to writing up and disseminating research It offers Demonstration of creative methods using both primary or secondary data Practical guidance on overcoming common hurdles such as getting ethical clearance and conducting a risk assessment Encouragement to reflect critically on the processes involved in research The authors provide a complete toolkit for conducting research in geography while ensuring the most cutting edge methods are unintimidating to the reader

The Walking Dead at Saqqara Lara Weiss, 2022-06-21 Funerary rituals and the cult of the dead are classics of research in religious studies especially for ancient Egypt Still we know relatively little about how people interacted in daily life at the city of Memphis and its Saqqara necropolis in the late second millennium BCE By focussing on lived ancient religion we can see that the social and religious strategies employed by the individuals at Saqqara are not just means on the way to religious post mortem salvation nor is their self representation simply intended to manifest social status On the contrary the religious practices at Saqqara show in their complex spatiality a wide spectrum of options to configure sociality before and after one s own death The analytical distinction between religion and other forms of human practices and sociality illuminates the range of cultural practices and how people selected modified or even avoided certain religious practices As a result pre funerary funerary and practices of the subsequent mortuary cults in close connection with religious practices directed towards other ancestors and deities allow the formation of imagined and functioning reminiscence clusters as central social groups at Saqqara creating a heuristic model applicable also to other contexts
