Teaching the Pursuit of Science John H. Woodburn, Ellsworth Scott Obourn, 1965

Inquiry into the Singapore Science Classroom Aik-Ling Tan, Chew-Leng Poon, Shirley S.L. Lim, 2014-05-19 This book offers an insight into the research and practices of science teaching and learning in the Singapore classroom with particular attention paid to how they map on to science as inquiry It provides a spectrum of Singapore s science educational practices through all levels of its education system detailing both successes and shortcomings The book features a collection of research and discourse by science educators in Singapore organized around four themes that are essential components of approaching science as inquiry teachers ideas and their practices opportunities and constraints from a systemic level students competencies and readiness to learn through

inquiry and the need for greater awareness of the role of informal learning avenues in science education In addition the discourse within each theme is enriched by commentary from a leading international academic which helps to consolidate ideas as well as position the issues within a wider theoretical and international context Overall the papers set out important contexts for readers to understand the current state of science education in Singapore They also highlight strengths and gaps in practices of science as inquiry as well as provide suggestions about how the system can be improved These research findings are therefore helpful as they provide honest and evidence based feedback as well as tangible and doable ideas that policy makers teachers students and school administrators can adopt adapt and enhance

Biological Invasions in South Africa Brian W. van Wilgen, John Measey, David M. Richardson, John R. Wilson, Tsungai A. Zengeya, 2020-03-10 This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa where research has been conducted over more than three decades and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological economic and social effects It covers a broad range of themes including history policy development and implementation the status of invasions of animals and plants in terrestrial marine and freshwater environments the development of a robust ecological theory around biological invasions the effectiveness of management interventions and scenarios for the future The South African situation stands out because of the remarkable diversity of the country and the wide range of problems encountered in its varied ecosystems which has resulted in a disproportionate investment into both research and management The South African experience holds many lessons for other parts of the world and this book should be of immense value to researchers students managers and policy makers who deal with biological invasions and ecosystem management and conservation in most other regions
