The Routledge Handbook of Responsible Investment Tessa Hebb, James Hawley, Andreas Hoepner, Agnes Neher, David Wood, 2015-08-11 The UN supported Principles for Responsible Investment initiative has led to around a third of the world's financial assets being managed with a commitment to invest in a way that considers environmental social or governance ESG criteria The responsible investment trend has increased dramatically since the global financial crisis yet understanding of this field remains at an early stage This handbook provides an atlas of current practice in the field of responsible investment With a large global team of expert contributors the book explores the impact of responsible investment on key financial actors ranging from mainstream asset managers to religious organizations Offering students and researchers a comprehensive introduction to current scholarship and international structures in the expanding discipline of responsible investment this handbook is vital reading across the fields of finance economics and accounting

What Is the Role for Effective Pedagogy In Contemporary Higher Education? Carl Senior, Dilly Fung, Christopher Howard, Rowena Senior, 2018-10-05 The number of students entering into Higher Education HE continues to grow and as such the sector now stands at the threshold of a major shift in its philosophy No longer does the academic prerogative belong to a generation who valued learning for the sake of enlightenment Many contemporary undergraduate students enter their programmes of study with a primary desire to improve their position on the subsequent employability market Universities have been quick to meet this need and institutional offerings have followed suit enabling students to gain experience in a range of additional and subsidiary programmes that focus on the provision of value added benefits Here students are encouraged to develop expertise in a range of topics from entrepreneurship and enterprise to intellectual property and even leadership skills The first round of casualties that fall victim to such a shift are those programmes of study embedded within the humanities As is evidenced by the falling numbers of enrolling students the incoming cohort is less likely now to engage with such programmes while participation in programmes that have a clear employability component has never been so high To ensure that the HE sector continues to enable graduates to become effective citizens who contribute to the betterment of society a range of general questions need to be addressed What does it mean to be an authentic university in the modern era What are the real student expectations of HE and how are education providers framing and meeting these expectations Is a new breed of academic leadership needed that will both meet the expectations of the students and guide the aspirations of academic staff Finally do we need an opportunity to reflect on the effective design and delivery of curriculum Should the undergraduate student body play more of a role in the design of the curriculum or should the undergraduate student body play more of a role in the design of the curriculum or should they remain the recipients of a programme that has been designed by subject specialists The scope of this book is wide but it brings the design and delivery of higher education programmes under the empirical gaze of educational psychology That is to say all chapters centre on the impact of higher

educational programmes on the student teacher relationship student learning achievement and identity It is therefore crucial to explore the psychological impact of higher education institutions and how these can then be used to inform innovative educational practice and policy

Biopolitics and Structure in Legal Education Luca Siliquini-Cinelli, Thomas Giddens, 2023-06-30 Taking up the study of legal education in distinctly biopolitical terms this book provides a critical and political analysis of structure in the law school Legal education concerns the complex pathways by which an individual becomes a lawyer making the journey from lay person to expert from student to practitioner To pose the idea of a biopolitics of legal education is not only to recognise the tensions surrounding this journey but also to recognise that legal education is a key site in which the subject engages and is engaged by a particular structure and here the particular structure of the law school This book explores that structure by addressing the characteristics of the biopolitical orders engaged in legal education including understanding the lawyer as a commodity unpicking the force relations in legal education examining the ways codes of conduct in higher education impact academic freedom as well as putting the distinctly Western structures of legal learning within a wider context Assembling original field defining essays by both leading international scholars and emerging researchers it constitutes an indispensable resource in legal education research and scholarship that will appeal to legal academics everywhere
