Increases the coverage of PayPal in accordance with PayPal's amplified role for consumers and businesses. Expands the discussion of bank cards, dedicating a full chapter to magnetic stripe cards and a full chapter to chip and PIN technology. Protocols for Secure Electronic Commerce Third Edition offers a state-of-the-art overview of best practices for the security of e-commerce, complete with end-of-chapter review questions and an extensive bibliography of specialized references. A Solutions Manual and PowerPoint slides are available with qualifying course adoption.

Memory Online Qi Wang, 2022-12-30 This book presents cutting-edge research on memory in the age of the Internet and social media. The empirical studies reported in the ten chapters address the influence of the digital age on remembering in three broad areas: offloading memory and the associated costs, benefits, and boundary conditions; autobiographical memory online; and false memory at a time of fake news and misinformation. These studies employ innovative and rigorous methodological approaches that are ecologically valid in the online context. Their findings reveal complex and dynamic characteristics of human memory in a digitally mediated world that shapes our learning, our sense of self, and our beliefs and decision-making. Collectively, the chapters in this volume provide rich theoretical insights into the workings and functions of memory. This book ushers in a new era of research on memory in the age of digitization. *Memory Online* will be a beneficial read for students and scholars of Psychology, Cognitive Science, Communication, and Media Studies. The chapters in this book were originally published as a special issue of *Memory*.

The New Corporate Climate Leadership Edward Cameron, Emilie Pratico, 2021-12-05 This book provides a comprehensive treatment of the role of the private sector in accelerating the transition to a low-carbon, climate-resilient, and inclusive world. In the lead-up to and since the historic Paris Agreement on climate change, more than 6,000 companies from 120 countries representing more than 36.5 trillion in revenue have made climate commitments. Examining this trend, *The New Corporate Climate Leadership* provides a clear synthesis of the relationship between the real economy and climate change and offers a state-of-the-art assessment of corporate initiatives that focus on greenhouse gas emissions reductions and the management of climate risk through enhanced resilience. It debates the relative merits of incremental and sequenced ambition versus radical systems change, including a critique of the prevailing capitalist approach to climate change and provides an actionable guide to skills development for change-makers in the shift toward a low-carbon world. Drawing on perspectives from leading thinkers inside the private sector, across government, and within civil society, to truly interrogate the scale, scope, and speed of progress, this book provides a clear vision for what the next generation of corporate climate

leadership should look like Optimistic in tone this book will be of great interest to students scholars and practitioners of climate change and sustainable business
