interconnected world A professor of mine once mentioned Google back when I was studying computer science He said the search algorithm was brilliant but the minds behind the mathematical feat were not so adept at web design This explains Google Search's simplistic search box and buttons Not that any fancy superfluous design was needed since search was the main function of the tool and Google delivered Indeed Google delivered and became one of the largest and most reputable companies on earth today Spearheading the evolution of search engines for an ever growing Internet Google helped bring about the advent of a new industry that developed side by side with Internet marketing search engine optimization SEO Ranking among the top results in Google's search results page is a marketer's dream goal and a businessman's dream period There was a documented case back in Google's early years where a small business website was able to become the top result for a particular keyword for just one day and ended up raking in an impressive 20 000 in profit The numbers speak to what a powerful tool Google is for generating traffic to websites The numbers tell how lucrative it can be if you can hack your way to the top of Google Search

MEET THE AUTHOR G Dino Gino R Dino is a freelance web content specialist He studied Computer Science but is now more adept in SEO than computer programming He has been writing and developing myriad sorts of Web content on various topics for different people and companies since January of 2009 He enjoys doing what he does as much as he loves learning on the job When he's not writing for a living he's writing for leisure When he's not writing for leisure he's reading or gaming for inspiration When he's not doing either he hatches schemes to change or destroy the world Researching various areas of marketing the Internet and what eventually became a combination of both G is well acquainted with various concepts and practices in marketing branding search social media and web copy Aside from wanting to share what he discovers he also tries to regularly update his personal technology blog <http://www.xeroavitar.com> while stoking the flames of his penchant for literary writing

EXCERPT FROM THE BOOK We skimmed through the basics of ensuring useful content because that is the simplest to remember ensure quality useful content It is a stark contrast to how important it is and how challenging it can be to actually maintain quality in your content It is of foremost importance to remember that with quality useful content you may eventually reach the top of Google Search even without the tweaks Now let's delve into the technical details the hacks that Googlebot is sure to notice starting from the top We are literally starting from the top particularly the first few HTML tags and META elements that Googlebot sees first when it crawls a website Once more let's put Googlebot's skin on for a moment and breeze through links in the Internet as you would streets in your neighborhood Say for instance we come across anchor text within a particular website that says dog kennels and training and points to the URL dogstrainingandsupplies.com Let's go through a simplified blow by blow account of what Googlebot sees and likes
