**Handbook of Automated Scoring** Duanli Yan, André A. Rupp, Peter W. Foltz, 2020-02-26 Automated scoring engines require a careful balancing of the contributions of technology NLP psychometrics artificial intelligence and the learning sciences The present handbook is evidence that the theories methodologies and underlying technology that surround automated scoring have reached maturity and that there is a growing acceptance of these technologies among experts and the public From the Foreword by Alina von Davier ACTNext Senior Vice President Handbook of Automated Scoring Theory into Practice provides a scientifically grounded overview of the key research efforts required to move automated scoring systems into operational practice It examines the field of automated scoring from the viewpoint of related scientific fields serving as its foundation the latest developments of computational methodologies utilized in automated scoring and several large scale real world applications of automated scoring for complex learning and assessment systems The book is organized into three parts that cover 1 theoretical foundations 2 operational methodologies and 3 practical illustrations each with a commentary In addition the handbook includes an introduction and synthesis chapter as well as a cross chapter glossary

*Handbook of Special Education* James M. Kauffman, Daniel P. Hallahan, Paige Cullen Pullen, 2017-05-25 The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education To ensure consistency across the volume chapter authors review and integrate existing research identify strengths and weaknesses note gaps in the literature and discuss implications for practice and future research The second edition has been fully updated throughout to take into account recent changes to federal laws as well as the most current academic research and an entirely new section has been added on research methods in special education

*Educational Research and Innovation Innovating Education and Educating for Innovation The Power of Digital Technologies and Skills* OECD, 2016-09-26 OECD s Innovation Strategy calls upon all sectors in the economy and society to innovate in order to foster productivity growth and well being Education systems are critically important for innovation through the development of skills that nurture new ideas and technologies *The Nature of Culture* Miriam N. Haidle, Nicholas J. Conard, Michael Bolus, 2016-01-19 This volume introduces a model of the expansion of cultural capacity as a systemic approach with biological historical and individual dimensions It is contrasted with existing approaches from primatology and behavioural ecology influential factors like differences in life history and demography are discussed and the different stages of the development of cultural capacity in human evolution are traced in the archaeological record The volume provides a synthetic view on a the different factors and mechanisms of cultural development and b expansions of cultural capacities in human evolution beyond the capacities observed in animal culture so far It is an important topic because only a volume of contributions from different disciplines can yield the necessary breadth to discuss the complex subject The model introduced and discussed originates in the naturalist context and tries to open the discussion to some

culturalist aspects thus the publication in a series with archaeological and biological emphasis is apt As a new development the synthetic model of expansion of cultural capacity is introduced and discussed in a broad perspective
