### **IBM Worklight—Overview**

IBM® Worklight® software helps enable organizational leaders to extend their business to mobile devices. This software provides an open, comprehensive and advanced mobile application platform for smart-phones and tablets, helping organizations of all sizes to efficiently develop, connect, run and manage mobile and omni-channel applications. Leveraging standards-based technologies and tools, the IBM team has created Worklight software that provides a single integrated platform. This platform includes a comprehensive development environment, mobile-optimized runtime middleware, a private enterprise application store and an integrated management and analytics console—all supported by a variety of security mechanisms.

**Develop.** The IBM Worklight Studio and the IBM Worklight software development kit (SDK) simplify the development of mobile and omni-channel applications (apps) throughout multiple mobile platforms, including iOS, Android, BlackBerry, Windows 8, Windows Phone and Java ME. The IBM Worklight optimization framework fosters code reuse while delivering rich user experiences that match the styling requirements of each target environment. With such code reuse, IBM Worklight reduces costs of development, reduces time-to-market and provides strong support for your ongoing management efforts.

**Connect.** The IBM Worklight Server architecture and adapter technology simplifies the integration of mobile apps with back-end enterprise systems and cloud-based services. The IBM Worklight Server is designed
