, 1998 **Proceedings of the International Congress of Mathematicians: Invited lectures** Gerd Fischer, Ulf Rehmann, 1998 [From Representation Theory to Mathematical Physics and Back](#) Mikhail Khovanov, Joshua Sussan, Anton Zeitlin, 2025-05-14 This volume is a proceedings of a workshop at the Simons Center for Geometry and Physics from May 31 June 4 2022 The workshop highlighted progress in the areas of vertex operator algebras conformal field theory categorification low dimensional topology and representation theory of affine Lie algebras loop groups and quantum groups In the past 40 years string theory gave rise to the mathematical theory of vertex operator algebras which led to the construction of representations of affine Lie algebras and the Moonshine module of the Monster group These mathematical constructions have in turn led to ideas about 3 dimensional quantum gravity In another direction the discovery of the Jones polynomial led to a physical construction of 3 dimensional topological quantum field theories TQFTs which in turn advanced many mathematical developments in quantum groups and low dimensional topology Louis Crane and Igor Frenkel introduced the categorification program with the goal of upgrading 3 dimensional TQFTs coming from representation theory of quantum groups to 4 dimensional TQFTs This idea gave rise to the development of link homologies constructed from representation theoretic algebraic geometric combinatorial and physical structures Articles in this volume present both classical and new

results related to these topics They will be interesting to researchers and graduate students working in mathematical aspects of modern quantum field theory *Algebraic Geometry* Dan Abramovich,2009 The 2005 AMS Summer Institute on Algebraic Geometry in Seattle was an enormous event With over 500 participants including many of the world s leading experts it was perhaps the largest conference on algebraic geometry ever held These two proceedings volumes present research and expository papers by some of the most outstanding speakers at the meeting vividly conveying the grandeur and vigor of the subject The most exciting topics in current algebraic geometry research receive very ample treatment For instance there is enlightening information on many of the latest technical tools from jet schemes and derived categories to algebraic stacks Numerous papers delve into the geometry of various moduli spaces including those of stable curves stable maps coherent sheaves and abelian varieties Other papers discuss the recent dramatic advances in higher dimensional bi rational geometry while still others trace the influence of quantum field theory on algebraic geometry via mirror symmetry Gromov Witten invariants and symplectic geometry The proceedings of earlier algebraic geometry AMS Institutes held at Woods Hole Arcata Bowdoin and Santa Cruz have become classics The present volumes promise to be equally influential They present the state of the art in algebraic geometry in papers that will have broad interest and enduring value **Mathematical Reviews** ,2008 Shimura Varieties Thomas Haines,Michael Harris,2020-02-20 This is the second volume of a series of mainly expository articles on the arithmetic theory of automorphic forms It forms a sequel to *On the Stabilization of the Trace Formula* published in 2011 The books are intended primarily for two groups of readers those interested in the structure of automorphic forms on reductive groups over number fields and specifically in qualitative information on multiplicities of automorphic representations and those interested in the classification of  $l$ -adic representations of Galois groups of number fields Langlands conjectures elaborate on the notion that these two problems overlap considerably These volumes present convincing evidence supporting this clearly and succinctly enough that readers can pass with minimal effort between the two points of view Over a decade s worth of progress toward the stabilization of the Arthur Selberg trace formula culminating in Ngo Bau Chau s proof of the Fundamental Lemma makes this series timely *International Congress of Mathematicians* ,1986 *Atti Del ...
