

Memories of School Days

3 pages | 537 words

Every single person has specific memories they will cherish and recall forever. But when it comes to remembering bad moments, why do people decide to forget them and move on? From a personal perspective, I believe our past will remain unmodified, but the resulting memories, whether good or bad, leave behind valuable lessons. Even though others may view the opposite, it has been proven that the ability to remember outstanding moments in our life helps us thrive because we are guided or inspired by the experiences and observations we lived. Research, itself, has proved that humans derive knowledge, guidance, and inspiration from past experiences and observations, so why do people continue to hinder their past? An article titled, "Memories Help Us Learn," described how scientist from the University of Texas concluded that memories are an essential source for success. "Memories are not just for reflecting on the past; they help us make the best decisions for the future," says Preston" (1). Intellectuals, like Preston, say that because of memories we are guided and inspired towards success by making effective choices. Memories made by observations in the past help us in an effort to learn from them and receive inspiration to succeed. For instance, a very personal observation, I obtained understanding and currently use as motivation, was when my father was seeking for a well-paid job but wasn't able to because he needed a higher level of education, ending in a position he detested, while being paid poorly. From this memory, I learned that if we want to work in a job where we earn lots money, education will be the road to get there, inspiring me to put forth my full potential in school. Remembering and learning from past observations encourages us to pursue the degree of prosperity we desire. Since we all acquire guidance through the memories we developed by experience, the present and future have prepared for us a life with incredible accomplishments. No matter the type of memory, it will eternally retain a lesson that will guide us in other situations. For example, a few months ago, I was given multiple assignments, which resulted in me over stressing and not completing none of my tasks. Days after, my teacher announced we were going to take a test and said studying would determine our score. After reviewing the items I had to study, I began to stress but later realized it wouldn't take me anywhere. My experience was a clear example of how memorable lessons from the past guide us in the present and future since, in my case, applying the lesson I learned, allowed me to complete studying in a successful manner. The experiences we've confronted give us all an opportunity to reconnect with the past and apply this wisdom to our present or future. Having memories from the past, whether they bring pain or joy, has been proven helpful in our effort to prosper because we obtain guidance or inspiration through the experiences and observations one encountered. If we ignore our past, we will constantly be open to the same challenges, generating no improvement nor success....

A Mind At A Time Mel Levine,2012-12-11 Different minds learn differently writes Dr Mel Levine one of the best known education experts and paediatricians in America today And that s a problem for many children because most schools still cling to a one size fits all education philosophy In **A MIND AT A TIME** Dr Levine shows parents and others who care for children how to identify these individual learning patterns He explains how parents and teachers can encourage a child s strengths and bypass the child s weaknesses This type of teaching produces satisfaction and achievement instead of frustration and failure Different brains are differently wired with eight fundamental systems of learning that draw on a variety of neurodevelopmental capacities Certain students are strong in certain areas and some are strong in others but no one is equally capable in all eight Learning begins at school but it doesn t end there Frustrating a child s desire to learn will have lifelong repercussions We must begin to pay more attention to individual learning styles to individual minds urges Dr Levine so that we can maximise our children s learning potential **A MIND AT A TIME** shows us how

The Memory Key Liana Liu,2015-03-03 Lora Mint is determined not to forget Though her mother s been dead for five years Lora struggles to remember every detail about her most important the specific events that occurred the night she sped off in her car never to return But in a world ravaged by Vergets disease a viral form of Alzheimer s that isn t easy Usually Lora is aided by her memory key a standard issue chip embedded in her brain that preserves memories just the way a human brain would Then a minor accident damages Lora s key and her memories go haywire Suddenly Lora remembers a moment from the night of her mother s disappearance that indicates her death was no accident Can she trust these formerly forgotten memories Or is her ability to remember every painful part of her past driving her slowly mad burying the truth forever Lora s story of longing for her lost mother and for the truth behind her broken memories takes readers on a twisty ride The authentic emotional narrative sparks fascinating questions about memory and privacy in a world that increasingly relies on electronic recall

willingness of comfortably situated people to open themselves to authentic listening and the possibilities of having their world views transformed by writing center students Good intentions alone particularly good intentions grounded in a missionary narrative are not enough to overcome the potentially oppressive nature of literacy education Grimm begins by positioning the debate about the function of the writing center in the larger cultural conflict created by postmodern conditions She locates writing center work within the historical contradictions of literacy then analyzes the way composition teaching regulates an academic identity She goes on to show how postmodern theories of subjectivity offer ways to intervene in that regulation After reconceptualizing the politics of writing center administration Grimm ultimately argues for a conception of fairness that holds writing center workers responsible for not only granting students membership to the academic literacy club but also for changing the gates of that club when change is necessary Good Intentions is essential reading for educators involved with writing centers in any capacity whether they be directors researchers professional and undergraduate staff or simply teachers of students who use writing centers
