

First Order Linear Differential Equations

Any equation containing a derivative is called a differential equation.

A function which satisfies the equation is called a solution to the differential equation.

The order of the differential equation is the order of the highest derivative involved.

The degree of the differential equation is the degree of the power of the highest derivative involved.

When a differential equation is of the form $\frac{dy}{dx} = f(y)$

$\Rightarrow \frac{1}{f(y)} dy = dx$ We can then integrate both sides.

$\int \frac{dy}{f(y)} = \int dx$ This will obtain the general solution.
