For Use As Enrichment After CAP Foam Rocket  
by AAS/SW Joint National Project: STEM Outreach

Partners in Aerospace and STEM Education:

Arnold Air Society

Civil Air Patrol

United States Air Force

Air Force Association

Silver Wings

Topics: rockets, Newton's laws of motion, matter (science, math)

Length of Lesson: 45-60 minutes, or as long as is desired, using as much of this lesson as is needed

Lesson Reference: <http://spaceplace.jpl.nasa.gov/en/kids/rocket.shtml>  
[http://www.fmalive.com/\\_downloads/fizzy20070511.pdf](http://www.fmalive.com/_downloads/fizzy20070511.pdf)

National Science Standards:

- Content Standard B: Physical Science
  - Position and motion of objects
- Content Standard E: Science and Technology
  - Abilities of technological design
  - Understanding about science and technology

Objectives:

- Students will construct and launch a rocket.
- Students will explain and apply Newton's laws of motion.
- Students will identify a solid, liquid, and gas.
- Students will demonstrate a chemical reaction.

Background Information:

The lesson, which demonstrates rocketry and Newton's laws of motion, will take longer than thirty minutes if each step is followed. If time is an issue, you do NOT need to have students make the film canister look like a rocket. You may skip step 4 in this lesson plan. If this is your plan, have the film canisters already filled about 1/3 full of water. Distribute the prepared film canisters to students along with an effervescent tablet to use with either the "Fizzy Rocket Data Sheet" or "Fizzy Rocket Experiment Form."

## **Fizzy Rockets Lesson Plan:**

**Culturally Specific Pedagogy in the Mathematics Classroom** Jacqueline Leonard, 2017-10-03 Culturally Specific Pedagogy in the Mathematics Classroom offers a wide variety of conceptual and curricular resources for teachers interested in teaching mathematics in a way that challenges stratification based upon race class gender and other forms of oppression that students face in today's world. With the publication of this book, all teachers will have available to them instructional strategies in mathematics for meeting the academic needs of culturally diverse students. They will have an explanation of the linkage between culture and students' mathematical cognition and problem solving. The ease in which Leonard brings the reader along and the caring way she tells a story about making mathematics a fun and social justice experience makes for an exciting learning opportunity for all students and teachers. Carl A. Grant, University of Wisconsin-Madison, United States. From the Foreword: Mathematics educators are in a period of deep concern about our ability to educate all students in mathematics. Most students of color do not have the opportunities to fully learn mathematics. Nothing more important can be done for these students and their teachers than to publish this book, addressing the miseducation of these students and offering a way to change what we are doing. Carol E. Malloy, University of North Carolina-Chapel Hill, United States. This compelling text advocates the use of culturally specific pedagogy to enhance the mathematics instruction of diverse students. It accomplishes this by making clear the link between research and practice and offering lesson templates that teachers can use with ethnically and culturally diverse students and with females. Specifically, the text draws on sociocultural theory and research on culture and mathematics cognition to focus on three goals: using qualitative research to extend the literature on culturally based education to African American and Latina/o; The Bottler and Packer, 1955; **The Times Index**, 2006; Indexes: the Times, Sunday Times, and magazine Times; literary supplement; Times educational supplement; Times educational supplement; Scotland and the Times higher education supplement; *The Guardian Index*, 1997; **Rockets: an educator's guide with activities in science, mathematics, and technology**. Deborah A. Shearer, 2008. This guide provides teachers and students many opportunities. Chapters within the guide present the history of rocketry, National Aeronautics and Space Administration's NASA's 21st Century Space Exploration Policy, rocketry principles, and practical rocketry. These topics lay the foundation for what follows: a wealth of dynamic rocket science classroom activities that work. The activities focus on Sir Isaac Newton's laws of motion and how they apply to rockets. They incorporate cooperative learning, problem solving, critical thinking, and hands-on involvement. They support national and state standards for science, mathematics, and technology across many grade levels. All of the activities are designed with the classroom in mind. They include clear descriptions, background information for the teacher and student, detailed procedures, and tips lists of readily available materials, assessments, questions for discussion, and extensions. The activities are designed to foster excitement and a passion for learning. It has been created as a two- to six-week classroom unit, depending upon the grade level of the students.

but individual activities can be extracted and used as stand alone classroom experiences Teachers will find activity objectives and principles clearly stated along with the vocabulary terms necessary for understanding the principles involved The original Rockets Teacher Guide was published by NASA s Education Division in the mid 1990s
