[Retrieval and Organizational Strategies in Conceptual Memory \(PLE: Memory\)](#) Janet Kolodner, 2014-05-09 Someday we expect that computers will be able to keep us informed about the news People have imagined being able to ask their home computers questions such as What s going on in the world Originally published in 1984 this book is a fascinating look at the world of memory and computers before the internet became the mainstream phenomenon it is today It looks at the early development of a computer system that could keep us informed in a way that we now take for granted Presenting a theory of remembering based on human information processing it begins to address many of the hard problems implicated in the quest to make computers remember The book had two purposes in presenting this theory of remembering First to be used in implementing intelligent computer systems including fact retrieval systems and intelligent systems in general Any intelligent program needs to use and store and use a great deal of knowledge The strategies and structures in the book were designed to be used for that purpose Second the theory attempts to explain how people s memories work and makes predictions about the organization of human memory

Academic Writing and

Genre Ian Bruce,2008-02-07 The focus of this book is the use of genre based approaches to teaching academic writing Genre based courses enable second language learners to integrate their linguistic organisational and contextual knowledge in a variety of different tasks The book reviews pedagogical approaches to genre through English for Specific Purposes and Systemic Functional Linguistics to present a synthesis of the current research being undertaken in the field From this theoretical base Ian Bruce proposes a new model of genre based approaches to academic writing and analyses the ways in which this can be implemented in pedagogy and curriculum design Academic Writing and Genre is a cutting edge monograph which will be essential reading for researchers in applied linguistics

The Process of Question Answering Wendy G. Lehnert,2022-11-01 Originally published in 1978 The Process of Question Answering examines a phenomenon that relies on many realms of human cognition language comprehension memory retrieval and language generation Problems in computational question answering assume a new perspective when question answering is viewed as a problem in natural language processing A theory of human question answering must necessarily entail a theory of human memory organization and theories of the cognitive processes that access and manipulate information in memory This book describes question answering as a particular task in information processing The theoretical models described here have been built on a formulation of general theories in natural language processing theories about language that were developed without the specific problem of question answering in mind By requiring programmers to be concerned with the precise form of information in memory and the precise operations manipulating that information they can uncover significant problems that would otherwise be overlooked An early insight into artificial intelligence today this reissue can be enjoyed in its historical context
