Macroeconomic Principles Stephen Rubb,Scott Sumner,2018-10-18 Created specifically for the economics course as taught in business schools Economic Principles A Business Perspective covers the fundamentals of economics in the context of today s globalized business world with strong examples integrated technology and practical pedagogy Integrated business and policy briefs in depth case studies chapter ending business applications thoroughly explained graphs and a battery of simple but useful learning tools support the intersection of theory and practice It s accompanied by a robust media component SaplingPlus which combines Sapling s acclaimed online homework with a complete e book and all interactive features for the text [The Oxford Handbook of Africa and Economics: Context and concepts](#) Célestin Monga,Justin Yifu Lin,2015 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this lhandbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa s contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists [Expectations Matter](#) Olivier Coibion,Yuriy Gorodnichenko,2026-03-24 What people believe about the economy and why it matters How do expectations about the future influence economic behavior For decades economists have known that beliefs play a central role from how much households spend to how firms set prices to how central banks design policy But figuring out exactly how expectations affect decisions has been one of the field s most persistent empirical

challenges In this book Olivier Coibion and Yuriy Gorodnichenko present a fresh empirical approach using randomized controlled trials RCTs to study the causal impact of expectations Drawing on more than a decade of their research they show how targeted information treatments can generate experimental variation in beliefs making it possible to measure how those beliefs influence real world decisions Along the way they reassess the limits of the traditional rational expectations framework and offer a richer evidence based picture of how people form and act on their views about the economy Blending the credibility of field experiments with the big picture questions of macroeconomics the authors provide a clear practical guide to this new methodology from survey design to implementation to measuring how beliefs pass through into behavior While much of the book focuses on inflation expectations later chapters explore how this approach sheds light on the role of uncertainty in firm and household decision making the influence of expectations on financial behavior and how peer effects shape household spending For economists and social scientists alike this book offers a new lens on how beliefs work and why they matter

The Future of the South African Political Economy Post-COVID 19 Mzukisi Qobo, Mills Soko, Nomfundo Xenia Ngwenya, 2022-10-31 This book examines the COVID 19 pandemic through socioeconomic lens that draw on history approaches to state market relations and public policy perspectives In 2020 the world experienced the worst pandemic since the outbreak of the Spanish Flu of 1918 which continues to have far reaching implications for the global economy and triggered macro economic dislocations that severely affected the most vulnerable countries and segments of society This book was conceived as a response to the disruptive shifts induced by the pandemic with a particular focus on South Africa International experience has shown that countries and societies that have gone through tough economic times either as a consequence of wars or economic depressions have responded to crises by enacting unpopular policy measures based on difficult tradeoffs which often made way for innovation The authors outline policy responses to the COVID 19 crisis and propose several interventions to mitigate its effects These include developing innovative approaches to fiscal and monetary policies labour market policies industrial policies as well as social policies Building state capabilities improving the governance and performance of state institutions and managing digital change are some of the clear policy interventions that are laid out in this book

Global Finance and Development David Hudson, 2014-11-27 The question of money how to provide it and how to acquire it where needed is axiomatic to development The realities of global poverty and the inequalities between the haves and the have nots are clear and well documented and the gaps between world s richest and the world s poorest are ever increasing But even though funding development is assumed to be key the relationship between finance and development is contested and complex This book explores the variety of relationships between finance and development offering a broad and critical understanding of these connections and perspectives It breaks finance down into its various aspects with separate chapters on aid debt equity microfinance and remittances Throughout the text finance is presented as a double edged sword while it is a vital tool towards poverty reduction helping to fund development more critical approaches

remind us of the ways in which finance can hinder development It contains a range of case studies throughout to illustrate finance in practice including UK aid to India debt in Zambia Apple s investment in China microfinance in Mexico government bond issues in Chile and financial crisis in East Asia The text develops and explores a number of themes throughout such as the relationship between public and private sources of finance and debates about direct funding versus the allocation of credit through commercial financial markets The book also explores finance and development interactions at various levels from the global structure of finance through to local and everyday practices Global Finance and Development offers a critical understanding of the nature of finance and development This book encourages the reader to see financial processes as embedded within the broader structure of social relationships Finance is defined and demonstrated to be money and credit but also crucially the social relationships and institutions that enable the creation and distribution of credit and the consequences thereof This valuable text is essential reading for all those concerned with poverty inequality and development
