Wong, 2012 This book offers a survey of how female and male characters in English Renaissance theatre participated and interacted in musical activities both inside and outside the contemporary societal decorum Wong's analysis broadens our understanding of the general theatrical representation of music or musical dramaturgy and complicates the current discussion of musical portrayal and construction of gender during this period Wong discusses dramaturgical meanings of music and its association with gender love and erotomania in Renaissance plays The negotiation between the dichotomous qualities of the heavenly and the demonic finds extensive application in recent studies of music in early modern English plays However while ideological dualities identified in music in traditional Renaissance thinking may seem unequivocal various musical representations of characters and situations in early modern drama would prove otherwise Wong building upon the conventional model of binarism explores how playwrights created their musical characters and scenarios according to the received cultural use and perception of music and at the same time experimented with the multivalent meanings and significance embodied in theatrical music **A Cosmopolitan Approach to Literature** Didier Coste, 2022-12-30 This cross disciplinary approach to literary reading of any provenance based on an experimental cosmopolitan epistemology de and recontextualizes the texts from the points of view of multiple cultures and historical moments enriching interpretation and aesthetic experience beyond the backgrounds of the present reader and the origin of a particular literary discourse Trusting the authority of an author or an original text and ignoring the fundamental plurilingualism of the literary experience obstructs the wealth of cosmopolitan reading in a globalized and fragmented world A thorough critique of both local and overarching theories in clear dissent from the binaries of decolonial theory and the overextension of nomadic theory supports a precise research and teaching methodology at variance with past trends of Comparative and World Literature Considering literature as the aestheticized use of language which is universal the many analyses provided can be extrapolated to other genres eras and cultural areas **Journal of the Folk-Song Society** Folk-Song Society (Great Britain), 1918 Contains music **The English Malady** Glen Colburn, 2008 The eleven essays

collected in *The English Malady Enabling and Disabling Fictions* adopt perspectives from a variety of disciplines history sociology music theater and literary studies in order to examine manifestations of and writing about hysteria in Europe during the long eighteenth century The collection demonstrates not only that hysteria was an important cultural metaphor for the Enlightenment a fact sometimes obscured by scholarly emphasis on the study of hysteria as a nineteenth and early twentieth century phenomenon but also that the period TM s writers sometimes considered hysteria a blessing as well as a curse Implicit in the various arguments of this collection is the suggestion that hysteria might be considered an expression of early modern ambivalence about the emergence of modernity
