Made In China:

DV-Made China Zhen Zhang, Angela Zito, 2015-05-31 In 1990s post Reform China a growing number of people armed with video cameras poured out upon the Chinese landscape to both observe and contribute to the social changes then underway Happening upon the crucial platform of an older independent film movement this digital turn has given us a DV China that includes film and media communities across different social strata and disenfranchised groups including ethnic and religious minorities and LGBTQ communities DV Made China takes stock of these phenomena by surveying the social and cultural landscape of grassroots and alternative cinema practices after the digital turn around the beginning of the new century The volume shows how Chinese independent amateur and activist filmmakers energize the tension between old and new media performance and representation fiction and non fiction art and politics China and the world Essays by scholars in cinema and media studies anthropology history Asian and Tibetan studies bring innovative interdisciplinary methodologies to critically expand upon existing scholarship on contemporary Chinese independent documentary Their inquiries then extend to narrative feature activist video animation and other digital hybrids At every turn the book confronts digital ironies On the one hand its portability facilitates forms of radically private film production and audience habits of small screen consumption Yet it also simultaneously links up makers and consumers curators and censors allowing for speedier circulation more discussion and quicker formations of public political and aesthetic discourses DV Made China introduces new frameworks in a Chinese setting that range from aesthetics to ethical activism from digital shooting and editing techniques to the politics of film circulation in festivals and online Politics the authors urge travels along paths of aesthetic excitement and aesthetic choices conversely always bear ethical consequences The films their makers their audiences and their distributional pathways all harbor implications for social change that are closely intertwined with the fate of media culture in the new century of a world that both contains and is influenced by China

[Make China Great Again](#) Rongbin Han, 2016-03-31 On the Chinese internet alternate history is booming Millions of writers and readers fantasize about going back in time and changing their country's fate One envisions saving the Southern Song Dynasty from the Mongols and turning China into a capitalist democracy Another portrays a contemporary traveling to 1905 and sparking a communist revolution before the Chinese Communist Party was even founded These stories and others like them share a theme of national revival that echoes both the official narrative of the Chinese dream and populist movements around the world Why is alt history so popular in China and what does it reveal about politics and culture under authoritarianism Rongbin Han examines the production and consumption of online alt history fiction in China offering new insight into how authoritarian rule gains popular consent Combining in depth digital ethnography with analysis of dozens of alt history novels he explores how state intervention market forces and consumer preferences interact Han argues that alt history literature is a project of imagining an ideal China which simultaneously legitimizes and contests state ideology Tracing the popular resonance of the regime's nationalist

vision he demonstrates how citizens play a crucial role in constructing and maintaining the state's dominance. Because many see national revival as imminent under the party's leadership, they are willing to tolerate authoritarian rule in contrast to Western democracies where discontent has fueled populist politics. Introducing readers to the uncanny world of alt history, *Make China Great Again* underscores how aspirations for the rebirth of the nation can bolster undemocratic politics in China and elsewhere.

The Whirlpool That Produced China Zhao Tingyang, 2024-08-01. In *The Whirlpool That Produced China*, Zhao Tingyang offers a philosophical interpretation of China's historicity, explaining how the expansion of China was not due to the lures of expansionist behavior but to the offerings of the surrounding contenders as they were constantly being pulled into a whirlpool of growth and amalgamation. The peoples surrounding China on all four sides sought to win the greatest material benefits and greatest spiritual resources by shaping their ways of thinking and living around the evolving core culture of the central plains. Zhao also investigates how the tianxia vision of world order was able to dissolve the fierce currents of contention and create out of them the inclusive model of many cultures and many peoples with many forms of governance. He explains these reasons for why China became China by weaving together ontology with game theory methodology, the stag hunt. Ultimately, Zhao addresses the question of how ancient China became such an irresistible attraction, a stag to its vital periphery that once a population and territory was drawn into the game or the whirlpool, it was difficult if not impossible to withdraw.
