## 1. INTRODUCTION

The purpose of this site is to give you the skills you need to be a leader or an adult helper. Please do not use this information to diagnose or treat any child. Always call 911 for emergency assistance. A child is not an adult and needs to be treated as such.

### WAYS TO GET HELP

Always call 911 when you are uncertain or unsure of what to do. The only factor that can possibly determine if you really need to call 911 is the emergency. Do not call 911 for non-emergencies.

### HOW TO CALL THE EMS

- Stay calm.
- Make sure the phone can hear you.
- The operator will ask you a series of questions so they can get you the help you need. Just be sure to answer as clearly as you can.
- The operator will try to get you some location information, including the age of the child, the location of the child, and the location of the phone.
- The operator will try to get you some information about the child's condition. This will help you to get the help you need as quickly as possible.

### ESSENTIAL INFORMATION

- The location of the child (including the address, the street name, the city, and the state).
- The name of the child's parent or guardian.
- Any medical conditions the child has, such as asthma.
- Any allergies the child has, such as food allergies.
- Any medications the child is taking, such as insulin.

### CHILDREN'S REACTION

Children react to an emergency situation in different ways. Some children are very calm and some are very nervous. It is important to be patient and to provide the child with the support they need.

## 2. CHOKING

Choking occurs when an object becomes lodged in the airway. The Heimlich® Maneuver is the most effective way to remove the object.

### RECOGNITION

- Child coughing or gagging.
- Inability to breathe.
- Hoarse sounding.
- Child making high-pitched sounds or the child's face turning red or blue.
- Child's hands to their mouth.
- Drooping head or consciousness.

### ACTION

- Encourage the child to cough.
- If the child is unable to cough, the child is not breathing, or the child's face is turning blue, perform the Heimlich Maneuver.
- If the child is unable to cough, the child is not breathing, or the child's face is turning blue, perform the Heimlich Maneuver.
- If the child is unable to cough, the child is not breathing, or the child's face is turning blue, perform the Heimlich Maneuver.
- If the child is unable to cough, the child is not breathing, or the child's face is turning blue, perform the Heimlich Maneuver.

### ADAPTATIONS FOR A CHILD UNDER 1

- To perform the Heimlich maneuver on a child under 1, you should use your hands to support the child's chest.
- If the child is unable to cough, the child is not breathing, or the child's face is turning blue, perform the Heimlich maneuver.
