**Understanding Social Signals: How Do We Recognize the Intentions of Others?** Sebastian Loth, Jan P. De Ruiter, 2016-05-30 Powerful and economic sensors such as high definition cameras and corresponding recognition software have become readily available e.g. for face and motion recognition However designing user interfaces for robots phones and computers that facilitate a seamless intuitive and apparently effortless communication as between humans is still highly challenging This has shifted the focus from developing ever faster and higher resolution sensors to interpreting available sensor data for understanding social signals and recognising users intentions Psychologists Ethnologists Linguists and Sociologists have investigated social behaviour in human human interaction But their findings are rarely applied in the human robot interaction domain Instead robot designers tend to rely on either proof of concept or machine learning based methods In proving the concept developers effectively demonstrate that users are able to adapt to robots deployed in the public space Typically an initial period of collecting human robot interaction data is used for identifying frequently occurring problems These are then addressed by adjusting the interaction policies on the basis of the collected data However the updated policies are strongly biased by the initial design of the robot and might not reflect natural spontaneous user behaviour In the machine learning approach learning algorithms are used for finding a mapping between the sensor data space and a hypothesised or estimated set of intentions However this brute force approach ignores the possibility that some signals or modalities are superfluous or even disruptive in intention recognition Furthermore this method is very sensitive to peculiarities of the training data In sum both methods cannot reliably support natural interaction as they crucially depend on an accurate model of human intention recognition Therefore approaches to social robotics from engineers and computer scientists urgently have to be informed by studies of intention recognition in

natural human human communication Combining the investigation of natural human behaviour and the design of computer and robot interfaces can significantly improve the usability of modern technology For example robots will be easier to use by a broad public if they can interpret the social signals that users spontaneously produce for conveying their intentions anyway By correctly identifying and even anticipating the user s intention the user will perceive that the system truly understands her his needs Vice versa if a robot produces socially appropriate signals it will be easier for its users to understand the robot s intentions Furthermore studying natural behaviour as a basis for controlling robots and other devices results in greater robustness responsiveness and approachability Thus we welcome submissions that a investigate how relevant social signals can be identified in human behaviour b investigate the meaning of social signals in a specific context or task c identify the minimal set of intentions for describing a context or task d demonstrate how insights from the analysis of social behaviour can improve a robot s capabilities or e demonstrate how a robot can make itself more understandable to the user by producing more human like social signals *Sessional Papers* Great Britain. Recent Advancements in Structural Equation Modeling (SEM): From Both Methodological and Application Perspectives  
Oi-Man Kwok, Mike W.-L. Cheung, Suzanne Jak, Ehri Ryu, Jerry Jiun-Yu Wu, 2019-02-08 Structural equation modeling SEM is becoming the central and one of the most popular analytical tools in the social sciences Many classical and modern statistical techniques such as regression analysis path analysis confirmatory factor analysis and models with both measurement and structural components have been shown to fall under the umbrella of SEM Thus the flexibility of SEM makes it applicable to many research designs including experimental and non experimental data cross sectional and longitudinal data and multiple group and multilevel data In this eBook you will find 19 cutting edge papers from the Research Topic Recent Advancements in Structural Equation Modeling SEM These 19 papers cover a wide variety of topics related to SEM including a analysis of different types of data from cross sectional data with floor effects to complex survey data and longitudinal data b measurement related issues from the development of new scale to the evaluation of person fit and new ways to test measurement invariance and c technical advancement and software development We hope that the readers will gain new perspectives and be able to apply some of the new techniques and models discussed in these 19 papers *Chinese-Speaking Learners of English* Ryan Damerow, Kathleen Bailey, 2019-12-05 A compendium of the latest developments in research regarding English language education for Chinese speaking learners this volume combines cutting edge research from multiple internationally known scholars The chapters offer unique insights into some of the most salient issues related to this broad topic The seventh volume in the Global Research on Teaching and Learning English series co published with The International Research Foundation for English Language Education TIRF this book features chapters with original research written by TIRF Doctoral Dissertation Grant awardees The volume addresses the crucial and growing need for research based conversations on the contexts environments goals and measures of success for Chinese speaking learners of English It

includes sections on language assessment perceptions in university contexts and technology especially in relation to young learners in order to promote in depth discussion of the teaching and learning of English for native speakers of Chinese The volume s 13 research based chapters discuss topics such as the impact and implications of using emerging assessment tools the increase in English for Specific Purposes ESP courses academic speaking and writing and teaching in an online or hybrid environment Throughout the book the authors draw on their knowledge of their multiple contexts as well as their learners needs and goals This volume brings together innovative research for TESOL and TEFL students language teacher educators language policy specialists language assessment scholars and language teachers Readers will become familiar with how these issues related to Chinese speaking learners of English are being addressed in academic circles around the world

The Individual Microbe: Single-Cell Analysis and Agent-Based Modelling Johan H. J. Leveau, Ferdi L. Hellweger, Jan-Ulrich Kreft, Clara Prats, Weiwen Zhang, 2019-02-19 Recent technological advances in single cell microbiology using flow cytometry microfluidics x ray fluorescence microprobes and single cell omics allow for the observation of individuals within populations Simultaneously individual based models or more generally agent based models allow for individual microbes to be simulated Bridging these techniques forms the foundation of individual based ecology of microbes IBE IBE has elucidated genetic and phenotypic heterogeneity that has important consequences for a number of human interests including antibiotic or biocide resistance the productivity and stability of industrial fermentations the efficacy of food preservatives and the potential of pathogens to cause disease Individual based models can help us to understand how these sets of traits of individual microbes influence the above This eBook compiles all publications from a recent Research Topic in Frontiers in Microbiology It features recent research where individual observational and or modelling techniques are applied to gain unique insights into the ecology of microorganisms The Research Topic The Individual Microbe Single Cell Analysis and Agent Based Modelling arose from the 2016 ASM conference of the same name hosted by the American Society for Microbiology at its headquarters in Washington D C We are grateful to ASM for funding and hosting this conference
