English Elements, 2005 *Autocar*, 2005 **Introducing Sociology for AS Level** Ken Browne, 2006-10-06 The second edition of Ken Browne's highly successful *Introducing Sociology for AS level* provides in depth and up to date coverage of the complete specification for AQA AS level sociology. The first edition of this book was widely praised for its comprehensive coverage and student friendly style. In this second edition all of the chapters have been revised to include new studies reports and statistics. Key sociological terms are now systematically highlighted all the way through the book and included in a comprehensive glossary with fresh questions and activities added to develop and test students understanding further. Fuller consideration of issues of identity has been given throughout the text. More detailed advice has been provided on coursework including a top mark example to show students exactly what they have to do to achieve the highest grades. What's more two authentic exam questions are now included on every topic. Pitched at exactly the right level for AS sociology the book provides all the tools necessary to help students achieve top grades and a sound basis for progression to A2. A host of cartoons photographs graphs tables and spider diagrams help to enliven the text as well as reinforcing key issues. Web sites and web based activities are included throughout encouraging students to engage with the most recent social changes and developments in sociology. Although it assumes no previous knowledge of sociology its dedicated and in depth coverage of all the AQA's AS topics provides a useful reference tool for the synoptic elements at A2. The second edition of *Introducing Sociology for AS Level* combines sociological rigour and accessibility in a way unrivalled by any other book at this level. It will be an invaluable resource to anyone following the AQA specifications.

Driver Training for Automated Vehicles Siobhán E. Merriman, Katherine L. Plant, Kirsten M. A. Revell, Neville A. Stanton, 2024-04-30 Since the introduction of Automated Vehicles (AVs) on roads there have been a number of high profile collisions which have highlighted significant driver challenges. These include challenges associated with drivers trust in the automation their knowledge and awareness of the AV's capabilities and limitations and their reduced situation awareness of the road environment and the vehicle. Solutions are needed to overcome these challenges so that the expected benefits of AVs can be realised. *Driver Training for Automated Vehicles A Systems Approach* identifies the training requirements for drivers of AVs and takes a systematic approach to design develop implement and evaluate a comprehensive training package to address these requirements. This book explores how training can overcome the driver challenges associated with AVs by improving drivers mental models trust in automation decisions and behaviour when activating a Level 4 AV. It presents a systematic approach to the training lifecycle by first presenting the current state of research into AVs identifying the challenges and training requirements for drivers of AVs and then developing and evaluating a training programme to achieve these requirements. This fascinating title highlights the need for drivers to undergo training

for AVs and takes us a step closer to this need It walks readers through a systematic four step process and provides practical guidance to develop and evaluate an effective training programme The reader will develop a thorough understanding of the current driver challenges with AVs and the methods and systems to mitigate them through current knowledge and research This book is an ideal read for practitioners designers and academics with a professional or research interest in AVs Its appeal extends to those in the fields of automotive design Systems Engineering Human Factors and education and training
