Replacement Contact at 1-800-654-8483 between 7:00am-6:00pm CST.

Special note: The top row of blue LEDs is the most important. It is always better to have more blue LEDs lit on the top row than on the bottom row. For example, an antenna position with 2 LEDs lit on the top row (as shown below) is better than a position with only 1 blue LED lit on the top row and 5 blue LEDs lit on the bottom row.

For further information on the signal meter, refer to the **HOW TO READ SIGNAL FINDER METER** section.

After you find the best position for your antenna, you can turn off the signal meter by pressing the ON/OFF button beside the meter. You can turn the signal meter on and check your signal level at any time by pressing this button.

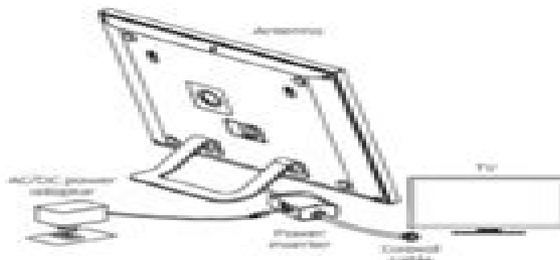

E. SCAN FOR CHANNELS ON YOUR TV: This step is very important. Your TV will NOT receive signals from the antenna without doing a channel scan. See your TV's menu to run a channel scan. You can also refer to the TV instruction manual for detailed information.

Contact us at 1-800-654-8483 if you need assistance.

Please note: For reception, all components must be connected and/or plugged in.

ANTENNA ASSEMBLY & INSTALLATION:

1. Remove **antenna** from package, place antenna in desired location.
2. Connect the **antenna** to the TV.
3. Connect the **power adapter** to the power inserter.

4. Plug the **power adapter** into an AC outlet.
5. Use the signal finder meter to find the best position for your antenna. Slowly rotate the antenna to find the position with the highest signal strength. This is the position where the most blue LEDs are lit on the top row followed by the most blue LEDs on the bottom row.

HOW TO READ SIGNAL METER:

The signal finder meter contains 2 rows of LEDs to display signal strength.

- 5 blue LEDs on the top row
- 5 blue LEDs on the bottom row

Weak signal: 0 top LED lit, 0 to 5 bottom LEDs lit

Low signal: 1 top LED lit, 0 to 5 bottom LEDs lit

Good signal: 2 top LEDs lit, 0 to 5 bottom LEDs lit

Strong signal: 3 top LEDs lit, 0 to 5 bottom LEDs lit

ANTENNA HELPFUL TIPS

Maximize the number of channels you receive by testing the antenna in several different locations and orientations. Use the meter to determine the best position of your location for the antenna. **Run a channel scan on your TV after finding the best position.** Refer to the instruction manual that came with your TV if you are not sure how to run a channel scan. If you have minor picture break-up with a specific channel, slightly rotating the antenna may help. Anytime the antenna is repositioned, run a channel scan again to ensure the best recognition.

Position or mount the antenna as high as possible or near a window for best performance.

Visit www.antennaweb.org or www.fcc.gov for DTV reception maps to determine the available television stations and location of the broadcast towers in your area.
