

Pulleys

The pulleys used in this type of question consist of a grooved wheel and a block which holds it. A rope runs in the groove around the wheel and one end will be attached to either: a weight, a fixed object like the ceiling or to another pulley. For the purposes of these questions you can ignore the effect of friction.

Single Pulley

3. Which weight requires the least force to move?

Cognitive and Linguistic Aspects of Geographic Space D.M. Mark,Andrew U. Frank,2012-12-06 This book contains twenty eight papers by participants in the NATO Advanced Study Institute ASI on Cognitive and Linguistic Aspects of Geographic Space held in Las Navas del Marqués Spain July 8 20 1990 The NATO ASI marked a stage in a two year research project at the U S National Center for Geographic Information and Analysis NCGIA In 1987 the U S National Science Foundation issued a solicitation for proposals to establish the NCGIA and one element of that solicitation was a call for research on a fundamental theory of spatial relations We felt that such a fundamental theory could be searched for in mathematics geometry topology or in cognitive science but that a simultaneous search in these two seemingly disparate research areas might produce novel results Thus as part of the NCGIA

proposal from a consortium consisting of the University of California at Santa Barbara the State University of New York at Buffalo and the University of Maine we proposed that the second major Research Initiative two year multidisciplinary research project of the NCOIA would address these issues and would be called Languages of Spatial Relations The grant to establish the NCOIA was awarded to our consortium late in 1988 Monthly Catalogue, United States Public Documents, 1982 **Monthly Catalog of United States Government Publications** United States.
