**COLOR PURIFIER**—On some models. If color should appear on the screen when viewing a black-and-white picture, slide the spring-loaded DEGAUSS switch to the right and hold in this position for a moment—then release the switch. The switch is located at the left rear of the receiver.

**MAGIC MEMORY TUNING**—The small knobs above have reference indicators. Quality Control at the factory has adjusted your receiver on a normal strength signal so that optimum picture performance is attained when the indicators are pointing straight up. If you should choose different control settings due to signal conditions in your area, reset the controls the way that you wish them and then pull off the knobs and push them back onto the control shafts with the indicators pointing straight up. This allows you to return to your favorite adjustments immediately in case of an accidental misadjustment.

The **HORIZONTAL HOLD** and **CONTRAST** controls are located at the rear of the receiver. Do not attempt to adjust any other controls found at the rear of the receiver. Their adjustment is critical and requires the attention of a qualified technician.
