The Economics of International Migration Giovanni Peri, 2016-01-07 The Economics of International Migration is a collection of the fundamental articles written by Giovanni Peri on the economic determinants and consequences of international migration These papers have provided the theoretical framework and empirical analysis for a rethinking of the economics of migration going beyond the Canonical model of labor demand and supply used until the 1990s Beginning with a simple model that recognizes the differences between immigrants and natives as workers the articles develop the analysis of complementarity specialization and productivity effect of immigrants in developed economies The book then presents a series of papers analyzing and testing the economic motivation for international migration Finally the focus is shifted to the effect of

immigration policies and their consequences on immigration and the economy **Urbanization with Chinese**

Characteristics: The Hukou System and Migration Kam Wing Chan,2018-04-19 Many agree that rapid urbanization in China in the late 20th and early 21st centuries is a mega process significantly reshaping China and the global economy China's urbanization also carries a certain mystique which has long fascinated generations of scholars and journalists alike As it has turned out many of the asserted Chinese feats are mostly fancied claims or gross misinterpretations of statistics for example There does exist however an urbanization that displays rather uncommon Chinese characteristics that remain to inadequately understood Building on his three decades of careful research Professor Kam Wing Chan expertly dissects the complexity of China's hukou system migration urbanization and their interrelationships in this set of journal articles published in the last ten years These works range from seminal papers on Chinese urban definitions and statistics and broad perspective analysis of the hukou system of its first semi centennial to examinations of migration trends and geography and critical evaluations of China's 2014 urbanization blueprint and hukou reform plan This convenient assemblage contains many of Chan's recent important works Together they also form a relatively coherent set on this topic They are essential readings to anyone serious about gaining a true understanding of the prodigious urbanization in contemporary China **Homelands**

Nadav G. Shelef,2020-07-15 Why are some territorial partitions accepted as the appropriate borders of a nation's homeland whereas in other places conflict continues despite or even because of division of territory In *Homelands* Nadav G Shelef develops a theory of what homelands are that acknowledges both their importance in domestic and international politics and their change over time These changes he argues driven by domestic political competition and help explain the variation in whether partitions resolve conflict *Homelands* also provides systematic comparable data about the homeland status of lost territory over time that allow it to bridge the persistent gap between constructivist theories of nationalism and positivist empirical analyses of international relations *Yearbook of International Organizations 2013-2014 (Volumes 1A-1B)* Union

of International Associations,2013-06-21 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events [Impact of Migration on Income Levels in Advanced Economies](#) Ms.Florence Jaumotte,Ksenia Koloskova,Ms.Sweta Chaman Saxena,2016-10-24 The recent refugee surge has brought attention to the macro critical policy issue of migration including speculations that migration can be an unfavorable phenomenon for the receiving economies A careful examination of the impact of migration on host economies is thus critical Focusing on the economic impact most of the academic discussion has centered on the effect of migration on labor markets and public finances Much less is known about the long term impact of immigration on the GDP per capita or the standard of living of host economies This note makes three contributions to estimating this impact it uses a restricted sample of advanced economies rather than a mixed sample of higher and lower income host countries it examines whether the GDP per capita impact varies for different skill levels of migrants and it goes beyond the aggregate impact of migration on GDP per capita to

examine how broadly gains in this regard are shared across the population In particular it examines whether migration impacts the income levels of those both at the top and at the bottom of the earnings distribution or whether gains are instead concentrated in a small group of high earners It finds that immigration significantly increases GDP per capita in advanced economies that both high and lower skilled migrants can raise labor productivity and that an increase in the migrant share benefits the average income per capita of both the bottom 90 percent and the top 10 percent of earners suggesting the gains from immigration are broadly shared
