scholars and practitioners have taken a keen interest in the field of Sport for Development and Peace SDP These efforts have  
largely focused on and debated the merits of sport as a tool for development diplomacy and peacebuilding in under resourced  
underdeveloped and conflict regions Making sense of the positive contributions that sport can offer to such complex and  
multi faceted issues requires understanding the various connections and meanings that individuals and communities ascribe  
to their sporting experiences This book offers a unique outlet for research that engages with rather than makes claims about  
individuals and communities around the world Diverse contemporary and thought provoking examples of qualitative methods  
in the study of SDP are detailed along with rich meaningful and provocative insights from these studies Readers are invited  
to think critically about the fields of enquiry philosophical underpinnings and methodologies utilised as well as the audiences  
engaged and topics explored We hope readers will join us in considering how these chapters can push the SDP field into  
more rigorous methodologically innovative and diverse approaches to research and evaluation while also engaging with  
actors who are still often spoken for or about rather than with This book was originally published as a special issue of
