Mental Maps Janne Holmén, Norbert Götz, 2021-11-28 The concept of mental maps is used in several disciplines including geography psychology history linguistics economics anthropology political science and computer game design However until now there has been little communication between these disciplines and methodological schools involved in mental mapping **Mental Maps Geographical and Historical Perspectives** addresses this situation by bringing together scholars from some of the related fields Ute Schneider examines the development of German geographer Heinrich Schiffrers mental maps using his books on Africa from the 1930s to the 1970s Efrat Ben Ze'ev and Chlo Yvroux investigate conceptions of Israel and Palestine particularly the West Bank held by French and Israeli students By superimposing large numbers of sketch maps Clarisse Didelon Loiseau Sophie de Ruffray and Nicolas Lambert identify soft and hard macro regions on the mental maps of geography students across the world Janne Holmén investigates whether the Baltic and the Mediterranean Seas are seen as links or divisions between the countries that line their shores according to the mental maps of high school seniors Similarly Dario Musolino maps regional preferences of Italian entrepreneurs Finally Lars Erik Edlund offers an essayistic account of mental mapping based on memories of maps in his own family This edited volume book uses printed maps survey data and hand drawn maps as sources contributing to the study of human perception of space from the perspectives of different disciplines The chapters in this book were originally published as a special issue of the *Journal of Cultural Geography*

The Opening Statement of the Prosecution in International Criminal Trials Sofia Stolk, 2021-04-20 This book addresses the discursive importance of the prosecution's opening statement before an international criminal tribunal Opening statements are considered to be largely irrelevant to the official legal proceedings but are simultaneously deployed to frame important historical events They are widely cited in international media as well as academic texts yet have been ignored by legal scholars as objects of study in their own right This book aims to remedy this neglect by analysing the narrative that is articulated in the opening statements of different prosecutors at different tribunals in different times It takes an interdisciplinary approach and looks at the meaning of the opening narrative beyond its function in the legal process in a strict sense discussing the ways in which the trial is situated in time and space and how it portrays the main characters It shows how perpetrators and victims places and histories are juridified in a narrative that whilst purporting to legitimise the trial the tribunal and international criminal law itself is beset with tensions and contradictions Providing an original perspective on the operation of international criminal law this book will be of considerable interest to those working in this area as well as those with relevant interests in International Transnational Law more generally Critical Legal Studies Law and Literature Socio Legal Studies Law and Geography and International Relations

Contested Curriculum Don Romesburg, 2025-04-15 Today many states have proposed so called Don t Say Gay bills that prohibit public school teachers from mentioning LGBTQ topics in the classroom But a few states like California have taken decisive steps in the other direction They mandate inclusive education that treats LGBTQ history as essential to the curriculum At once a history of an evolving movement and an activist handbook *Contested Curriculum* navigates the rocky path to LGBTQ inclusive K 12 history education in the United States and recounts the fight for a curriculum that recognizes the value of queer and trans lives What began in fits and starts in activism and educational materials across the late twentieth century led to the passage of California s landmark FAIR Education Act in 2011 ensuring that LGBTQ history has a place in the K 12 classroom Historian Don Romesburg the lead scholar who worked with advocacy organizations to pass the act recounts the decades long struggle to integrate LGBTQ content into history education policy textbooks and classrooms Looking at California and states that followed its lead he assesses the challenges and opportunities presented by this new way of teaching history Romesburg s powerful case for LGBTQ inclusive education is all the more urgent in this era of anti gay book bans regressive legislation and attempts to diminish the vital role that inclusive and honest history education should play in a democratic nation

Spatial and Transport Infrastructure Development in Europe Bernd Scholl, Ana Peric, Mathias Niedermaier, 2020-01-13 The Orient East Med Corridor is a key north south transport corridor for Europe Over its length of more than 2500 km it connects the seaports of northern Germany with the Danube ports and Greek seaports Seven capitals of EU member states are directly interlinked by the Corridor At present however it has genuine shortcomings

in several aspects The international working group Spatial and Transport Development in European Corridors Example Corridor 22 Hamburg Athens 2015 2018 trace the conditions for large scale corridor oriented spatial and transport development in Europe and in particular along the Orient East Med Corridor The contributions in the anthology also focus on the importance of transnational initiatives in Europe and on territorial effects of transport policies These topics are illustrated by analyses of current transport initiatives and urban developments at the most important nodes along the Corridor so called Hot Spots During the work process the authors asked themselves if and how a strategy for the Corridor can take effect for an integrated spatial and transport development between Hamburg and Athens The common answer is clear A strategy for the Orient East Med Corridor allows the organization of a more balanced flow of goods throughout Europe in the long run In the southeast section enormous land reserves in the close vicinity of railway stations can be activated for urban development Strengthening the Corridors infrastructure thus has a huge potential to trigger spatial development and ultimately contribute to territorial and social cohesion throughout Europe
