**Religion and Identity in the Indian Ocean World** Joshua Esler, Mark Fielding, 2025-09-18 This is a ground breaking volume on the role of religion as a major force of cohesion across the Indian Ocean region A diverse range of experts present a case for conceptualizing religion as an enabler of not only shared religious identities throughout the Indian Ocean world

but multiple shared identities mediated through religion particularly as religion intersects with other manifestations of human society in this part of the world This theme is explored through six major religious traditions many of which originated in the Indian Ocean region and all of which have played major roles throughout its history and to the present day These traditions include Judaism Christianity Islam Hinduism Jainism and Buddhism With this breadth and coverage of these traditions and their role in unifying communities from East Africa to Western Australia including those belonging to nations north of that expanse of ocean this book is a pioneering work on the multi religious identities of the region The Palgrave Handbook of African Politics, Governance and Development Samuel Ojo Oloruntoba, Toyin Falola, 2017-10-10 This handbook constitutes a single collection of well researched articles and essays on African politics governance and development from the pre colonial through colonial to the post colonial eras Over the course of these interconnected periods African politics have evolved with varied experiences across different parts of the continent As politics is embedded both in the economy and the society Africa has witnessed some changes in politics economics demography and its relations with the world in ways that requires in depth analysis This work provides an opportunity for old and new scholars to engage in the universe of the debate around African politics governance and development and will serve as a ready reference material for students researchers policy makers and investors that are concerned with these issues African Guerrillas Morten Bøås, Kevin C. Dunn, 2007 At the center of many of Africa s violent conflicts are movements that do not seem to fit any established theories of armed resistance African Guerrillas offers new models for understanding these movements eschewing one dimensional explanations The authors build on and in some cases debate the insights provided in Christopher Clapham s groundbreaking work They find a new generation of fighters one that reflects rage against the machinery of a dysfunctional state Their analysis of this phenomenon combining thematic chapters and a range of representative case studies is a crucial contribution to any effort to understand Africa s war torn societies **West Africa**, 2001 **Africa South of the Sahara, 1992** 21st 1992, 1991-10

**Democracy and Culture** Lioba Moshi, Abdulahi A. Osman, 2008 Since the end of the Cold War Africa has witnessed a political rebirth and second liberation as decades of autocracy and dictatorship became gradually replaced by a new wave of democratization and plural political competition This political rebirth has revived the Afro optimism that accompanied the independence decade of the 1960s This optimism however co exists with protracted and deadly conflicts in many parts of the continent from wars in Rwanda Democratic Republic of Congo and Somalia to stalemate in democratic reform in Niger Guinea and Cameroon and democratic retraction in Uganda Additionally Africa faces many problems including wars famine refugees internal displacement and a host of diseases such as HIV AIDS Similarly despite the adoption of constitutions that guarantee the basic human rights and freedoms by many African states human rights violations remain rampant throughout the continent s political landscape **Democracy and Culture An African Perspective** is an analysis of the democracy project in

Africa Basically the contributors seek answers to a number of fundamental questions How is democracy to be defined in the African context Is the Western style democracy which is being adopted in many parts of Africa culturally and environmentally neutral Can it really be replicated in Africa And what is the role of African culture in the current democracy project
