Its underlying aim is to help teachers become au fait with the terminology used in modern ELT coursebooks and to build confidence in their ability to explain grammar rules, both structural and functional. Among the bold innovations with this book is its A4 size which more readily accommodates the plentiful and highly commended tables of grammar items. It is also the first English teacher's grammar to use tree diagrams to show sentence constituents in full clarity. Other strengths include the many excerpts from coursebooks and resource books plus the excellent practical tips throughout. *Developing Materials for Language Teaching* Brian Tomlinson, 2003-12-02 In this book we offer the informed and reflective practitioner as the ideal agent for mediating between the practice and theory of language teaching. Some of the contributors might be labelled teachers, some materials developers, some applied linguists, some teacher trainers and some publishers, but all of them share four things in common: they have all had experience as teachers of a second or foreign language; they have all contributed to the development of second language materials; they are all well informed about developments in linguistic and psycholinguistic theory; and they all have respect for the teacher as the person with the power to decide what actually happens in the classroom.
