Five Ways The Similarities:

Designing Instruction Judith K. March, Karen H. Peters, 2008 A fresh new approach that strengthens the need for teaching with creative thinking strategies for administrative leadership teams Few textbooks have such detailed examples combined with the background study of best practices The authors have great credibility experience resources and abundant research to support their proposal A very well written text offering ample review of the research Sara E Spruce Professor of Education Olivet Nazarene University Use this research based instructional model to meet students achievement goals As the achievement gap between advantaged and disadvantaged students gets wider teachers and administrators need a proven process to help all students meet the requirements of NCLB This practitioner friendly guidebook provides a step by step approach to a complete standards based curriculum and the integration of best practices into the delivery and assessment of instruction in every classroom The authors present three capacity building features of the design process 1 training for building leadership teams to help teachers plan and lead the reform process 2 stewardship training to assist district administrators and principals in supporting and sustaining the implemented reforms and 3 a collaborative observation process to help teachers work together and in partnership with principals to monitor and improve classroom instruction Offering an education model that has been field tested with more than 50 school districts in the U S and Canada this book shows school leaders how to maximize collaborative observation and other team leadership processes to integrate reforms into a school s existing culture Educators will learn ways to Integrate instructional design with successful instructional reform Strengthen the learning culture through standards Develop effective performance indicators Apply curriculum mapping to instructional design Designing Instruction supports teachers and administrators working together to raise student achievement by using proven instructional design and best practices

Similarity and Analogical Reasoning

Stella Vosniadou, Andrew Ortony, 1989 Similarity and analogy are fundamental in human cognition They are crucial for recognition and classification and have been associated with scientific discovery and creativity Any adequate understanding of similarity and analogy requires the integration of theory and data from diverse domains This interdisciplinary volume explores current development in research and theory from psychological computational and educational perspectives and considers their implications for learning and instruction The distinguished contributors examine the psychological processes involved in reasoning by similarity and analogy the computational problems encountered in simulating analogical processing in problem solving and the conditions promoting the application of analogical reasoning in everyday situations
