## **Fixing Higher Education:**

*The Great Mistake* Christopher Newfield, 2016-11-15 A powerful hopeful critique of the unnecessary death spiral of higher education The Great Mistake is essential reading for those who wonder why students have been paying more to get less and for everyone who cares about the role the higher education system plays in improving the lives of average Americans Helen Small author of *The Value of the Humanities* Los Angeles Review of Books *Fixing Higher Education* Christian Schierenbeck, 2012-11-06 Christian Schierenbeck makes a provocative case that higher education across the globe suffers from a profound productivity crisis which prevents broad access to affordable and high quality educational services He shows how the vast productivity gap in higher education could be closed if academic managers borrowed some of the managerial practices applied by the world's leading business enterprises In order for this to happen in practice the author argues for radical changes in the policy framework for higher education *Saving State U* Nancy Folbre, 2011-03 Once upon a time students who were willing and able to work hard could obtain an affordable high quality education at a public university Those times are gone Intensified admissions competition coupled with opposition to public spending has scorched every campus Budget cuts tuition hikes and debt burdens are undermining the best path to upward mobility that this country ever built But despite all of this Americans still embrace ideals of equal opportunity and know that higher education represents a public good Students faculty staff and advocates are beginning to build political coalitions and develop new strategies to improve access enhance quality and simplify financial aid This book celebrates and will fortify their efforts In *Saving State U* economist Nancy Folbre brings the national debates of education experts down to the level of trying to teach and trying to learn at major state universities whose budgets have repeatedly been slashed restored and then slashed again Here is a brilliant firsthand account of the stakes involved the politics and the key debates raging through public campuses today In a passionate accessible voice Folbre also offers a sobering vision of the many possible futures of public higher education and their links to the fate of our democracy while looking at the practical ways in which change is now possible

**Fixing College Education** Charles Muscatine, 2009-08-13 Since his early days at the University of California Berkeley when he was fired for refusing to sign a loyalty oath during the Red Scare Charles Muscatine has been a dedicated teacher and higher education reformer Upon his reinstatement at Berkeley he founded Strawberry Creek College a six year experiment using full professors and small classes to teach lower division students Drawing on this belief in undergraduate teaching Muscatine's new book now offers a radical new design for American college education Muscatine begins with the observation that the mediocre undergraduate curriculum offered by most colleges and universities today is based on outdated ideas of what should be taught and what constitutes good teaching Although Muscatine is himself a well established research scholar he contends that the publish or perish research religion of college and university faculties has seriously damaged undergraduate education He offers a clear distinction between publishable research and the scholarship necessary

for good teaching Furthermore he recommends major changes in the education of professors including reconsidering both the requirement of the book length dissertation and the current organization of graduate departments Fixing College Education predicts new roles for students and faculty redefines educational breadth and depth and calls for deeper assessment of learning and teaching Muscatine highlights the outstanding colleges and universities including Harvard Boston University s University Professor s Program Evergreen State College and Fairhaven College at Western Washington University that have already remade their curricula successfully or adopted features like the ones he proposes Muscatine argues that the new curriculum is better able than the old to produce good scholars and good citizens for the twenty first century *Fixing College Education* , **Higher Education Outcomes Assessment for the Twenty-First Century** Peter Herson,Robert E. Dugan,Candy Schwartz,2013-05-09 This book discusses recent trends in outcomes assessment examines how state governments are reshaping the national discussion with higher education and explains how libraries must respond to these changes Higher Education Outcomes Assessment for the Twenty first Century focuses on recent developments in outcomes assessment especially from the perspectives of the federal government and state governments as well as foundations concerned about the state of higher education The authors identify the significant changes that these stakeholders call for information that academic librarians and anyone following outcomes assessment need to be aware of and interpret the discussions to identify implications for libraries Building upon the foundation of knowledge presented in the previous two Libraries Unlimited Outcomes Assessment in Higher Education titles this book provides readers with up to date coverage of topics such as the emerging metrics used to define student and institutional success the increased importance of accountability and the need to compare and assess the performance of programs and institutions rather than individual courses and the shift in prioritizing student outcomes over student learning outcomes The authors also spotlight the critical need for libraries to fit their role within the national discussion and suggest ways in which library managers and directors can play a role in redirecting the discussion to their benefit **Fix your Standard high; a few earnest words to young men and women, etc** J. T. OAKLEY,1872 **Academic Leadership and Governance of Higher Education** James T. Harris,Jason E. Lane,Jeffrey C. Sun,Gail F. not for profit sector This book covers the major functions and constituent departments and units within institutions the stakeholders from students and faculty through the echelons of administration the external environment of elected officials foundations philanthropists and the new changing media and innovations in teaching technology data analytics legal frameworks as well as economic demographic and political pressures The book is informed by the proposition that adhering to four principles which the authors identify as having enabled institutions of higher education to successfully navigate ever changing and volatile pasts will enable them to flourish in the coming decades The four principles are 1 Be mission centric by making all key decisions based on a core mission and set of values 2 Be able to adapt to environmental change in alignment with the mission and core values 3 Be committed to democratic ideals by seeking to promote them and modeling democratic practices on and off campus 4 Be models for inclusion equity and positive social change
