relationship to time is inextricably connected not only to persisting social inequities but to the climate crisis existential dread and a lethal fatalism This dazzling subversive and deeply hopeful book offers us different ways to experience time inspired by pre industrial cultures ecological cues and geological timescales that can bring within reach a more humane responsive way of living As planet bound animals we live inside shortening and lengthening days alongside gardens growing birds migrating and cliffs eroding the stretchy quality of waiting and desire the way the present may suddenly feel marbled with childhood memory the slow but sure procession of a pregnancy the time it takes to heal from injuries Odell urges us to become stewards of these different rhythms of life in which time is not reducible to standardized units and instead forms the very medium of possibility Saving Time tugs at the seams of reality as we know it the way we experience time itself and rearranges it imagining a world not centered on work the office clock or the profit motive If we can save time by imagining a life identity and source of meaning outside these things time might also save us
