

Setting GE Rotary limit switches

Establish Rotation

- Remove Limit switch cover
- Drive winch in UP direction – note direction of cam stack rotation
- Mark switch cover / cam stack to record cam stack rotation
- Use an insulated screwdriver to adjust the limit – avoid contacting screw terminals on operating switches while winch system is on.

Determine travel

- Figure out where piece must stop to avoid damage/misalignment – set overtravel to stop short of this point.
- Figure out what range of normal travel for piece must be – set normal limits to stop piece at these points
- For each end of travel, set overtravel limit first, then set end-of-travel limit.
- Make sure that the operator can clearly see the entire piece for its entire travel, or that spotters are in place to observe and clearly communicate with the operator.
