## **Geography Exemplar 2014 Grd 11:**

**Collecting for the Curriculum** Amy J. Catalano, 2015-09-28 If you are a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards then this book is the only one that offers explicit advice on collection development in curriculum collections for you. While there are many publications on the Common Core for school librarians and K-12 educators, no such literature exists for curriculum librarians at the post-secondary level. This book fills that gap, standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards (CCSS). The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices. The book begins with a primer on the CCSS and how curriculum librarians can support them. Discussion of the Standards is then woven through chapters arranged by content area that share research-based practices in curriculum development and instruction to guide you in curriculum selection. Material types covered include games, textbooks, children's literature, primary sources, counseling, and nonfiction. Additional chapters cover the management of curriculum collections, testing collections, and instruction and reference, as well as how to support and collect for special needs learners. Current practices in collection development for curriculum materials librarians are also reviewed. The book closes with a discussion of the future of curriculum materials.

**Holistic Financial Literacy Education** Thomas A. Lucey, 2026-02-27 *Holistic Financial Literacy Education* provides a scholarly foundation for a holistic vision of financial literacy, as well as instructional strategies for its teaching. This text shows pre- and in-service educators why and how we can teach financial literacy to youth within the social studies curriculum. This book employs a holistic approach to demonstrate how teachers can enhance youth financial literacy by addressing the interconnected personal, communal, and societal factors that shape financial understanding. It promotes discussions of the social principles and contexts that inform financial literacy and global human well-being, as well as the social consequences for a reductionist perspective of personal finances. Its eleven chapters cover a plethora of topics, from corporate ethics to psychological considerations to social biases. Combining theory with practice, this book offers classroom strategies, lesson plans, and practical guidance for teaching financial literacy and challenging current societal norms.
