health Pat Lyons author of Great Shape      **Supersized Lies** Robert Davis,2021-06-11 The world would have you believe that losing weight is easy but the truth is in many cases you're being fed a generous helping of falsehoods and misguided dieting advice. The media celebrities weight loss gurus and the Internet bombard society with recommendations about how to shed unwanted pounds. Count calories, cut carbs, exercise more, skip meals, drink more water, pop a pill. Yet as more people try diligently to follow this advice, waistlines continue to expand. In *Supersized Lies*, Robert J. Davis, PhD, aka The Healthy Skeptic, shows you why this inability to lose weight isn't your fault, as he reveals how hype, half-truths, and unproven solutions have steered you into fruitless quests that inflict emotional and physical harm. In this health and wellness book, the award-winning health journalist whose work has appeared on CNN, WebMD, and in *The Wall Street Journal*, reveals which weight loss measures are most and least likely to be effective. How conventional wisdom about weight loss is often wrong. How to spot misleading weight loss advice and avoid being duped into wasting time, money, and effort. How contrary to what we often hear, effective weight control doesn't require following complicated restrictive rules. The interesting history behind flawed weight loss advice and the forces that currently perpetuate and benefit from it. In addition to uncovering how and why we're being led astray, *Supersized Lies* lays out weight control strategies that research shows actually work, and it tells the inspiring stories of people who, after falling victim to the falsehoods of conventional guidance, have achieved success by forging their own paths. Written in a lively, easy-to-understand style, this myth-shattering book sheds surprising new light on old assumptions and offers an inspiring way forward to those caught in the cacophony of weight loss advice.

*Big Fat Lies: How the diet industry is making you sick, fat & poor* David Gillespie,2012-02-22 Diets and exercise won't help us lose weight. Vitamins and minerals are a waste of money and sometimes downright dangerous. Sugar makes us fat and sick. And polyunsaturated fat gives us cancer and works with sugar to give us heart disease. This book exists because I desperately hope that with a little knowledge, we can all vote with our feet and change the rules of the game before the game kills us. For decades, we've been told to eat less, exercise more, eat less saturated fat, eat more polyunsaturated oils, and take vitamin and omega-3 fatty acid supplements. For decades, this is what we've done, but the rates of obesity, heart disease, type 2 diabetes, dementia, and cancer have never been higher. The real culprits, David Gillespie tells us, are sugar and polyunsaturated oils. Analysing the latest scientific evidence, he shows us why, and outlines a plan to avoid them both without missing out or dieting. Gillespie exposes the powerful role the multibillion-dollar food, health, and diet industries have played in promoting the health messages we follow or feel guilty about not following. Discovering the truth about diets, exercise, supplements, and processed food is your first step towards improved health, greater happiness, and a longer life for you and your family. Gillespie is an informed and entertaining writer who makes his subject fascinating and inspires with his passion and logic. G MAGAZINE
