Impacts of Generative AI on Creativity in Higher Education Fields, Ziska, 2024-08-27 Many educators in the realm of higher education face the critical challenge of fostering creativity in students using traditional teaching methods. To revolutionize how we nurture and harness student creativity, the book explores the intersection of creativity, generative AI, and higher education with a fresh perspective and practical guidance for educators and institutions. It delves into the fundamental concepts of generative AI and its potential applications, providing educators with the tools to create more engaging and innovative learning environments. [Global curriculum guide for community health workers](#) World Health Organization, 2026-01-07 The contribution of community health workers (CHWs) to universal health coverage and their performance can be optimized through appropriate health workforce integration and health system support and by ensuring that they are equipped with the requisite competencies as related to their specific role. This guide was developed to assist in the conceptualization, design, and implementation of CHW curricula with a view to strengthening delivery of essential services at community level as an integral part of primary health care. Considering the wide variance of CHWs' roles across countries and settings, the competencies they require to deliver services are highly context-specific. This CHW curriculum guide should be adapted to the needs of different countries, health systems, programmes, and contexts. [Driver Training for Automated Vehicles](#) Siobhán E. Merriman, Katherine L. Plant, Kirsten M. A. Revell, Neville A. Stanton, 2024-04-30 Since the introduction of Automated Vehicles (AVs) on roads, there have been a number of high-profile collisions which have highlighted significant driver challenges. These include challenges associated with drivers' trust in the automation, their knowledge and awareness of the AV's capabilities and limitations, and their reduced situation awareness of the road environment and the vehicle. Solutions are needed to overcome these challenges so that the expected benefits of AVs can be realised. *Driver Training for Automated Vehicles: A Systems Approach* identifies the training requirements for drivers of AVs and takes a systematic approach to design, develop, implement, and evaluate a comprehensive training package to address these requirements. This book explores how training can overcome the driver challenges associated with AVs by improving drivers' mental models, trust in automation, decisions, and behaviour when activating a Level 4 AV. It presents a systematic approach to the training lifecycle by first presenting the current state of research into AVs, identifying the challenges and training requirements for drivers of AVs, and then developing and evaluating a training programme to achieve these requirements. This fascinating title highlights the need for drivers to undergo training for AVs and takes us a step closer to this need. It walks readers through a systematic four-step process and provides practical guidance to develop and evaluate an effective training programme. The reader will develop a thorough understanding of the current driver challenges with AVs and the

methods and systems to mitigate them through current knowledge and research This book is an ideal read for practitioners designers and academics with a professional or research interest in AVs Its appeal extends to those in the fields of automotive design Systems Engineering Human Factors and education and training *Ford Ka 2003 to 2008 (52 to 58 Registration)* M.
