How to Write a Summary ?

RULES OF THUMB FOR WRITING RESEARCH ARTICLES[1]

Tomislav Hengl[A], Michael Gould[B]

Abstract

The paper provides 'rules of thumb' for writing research articles (RA) and getting them published. These were discussed during the "Scientific writing course" organized for ITC PhD students by Cressie Communication Services. Important aspects of macro and sub-structure of a paper were selected through group discussions. The substructure and functions of different sections of RAs are described. Results of previous investigations and interviews among journal editors were used to summarize what makes a good RA. It was concluded that clear, logical, coherent, focused, good argument and well-structured writing gets the paper published and read. Some important rules of the thumb selected were: "Adjust your writing to the audience and purpose", "Avoid redundancy and unnecessary explanations" and "Write like you speak and then revise".

Keywords: Research article, rules of thumb, structure, publishing.
