Limping Towards Eden:

Animal Welfare: Limping Towards Eden John Webster, 2008-04-15 There has been a recent explosion of active concern in matters of animal welfare. The science behind animal welfare has progressed significantly. New codes of practice and legislation have come into being and innovative methods to assess welfare schemes for food production have emerged. Part of a major animal welfare series, *Animal Welfare: Limping Towards Eden* is John Webster's new and groundbreaking work on animal welfare. Building on his first book, the highly acclaimed *Animal Welfare: A Cool Eye Towards Eden*, it not only critically reviews areas of development but looks to how animal welfare can be improved in the future. Special consideration is given to defining animal welfare, fit and happy, and establishing a systematic approach for its evaluation: the five freedoms. Providing a sound ethical framework that affords proper respect to animals within the broader context of our duties as citizens to the welfare of society. Developing comprehensive, robust protocols for assessing animal welfare and the provisions that constitute good husbandry. Introducing an education policy that will increase human awareness of animal welfare problems and promote action to reduce suffering. This book is part of the UFAW Wiley Blackwell Animal Welfare Book Series. This major series of books, produced in collaboration between UFAW, The Universities Federation for Animal Welfare, and Wiley Blackwell, provides an authoritative source of information on worldwide developments, current thinking, and best practice in the field of animal welfare science and technology. For details of all of the titles in the series, see <http://www.wiley.com/go/ufaw> or www.wiley.com/go/ufaw.

Understanding Animal Welfare Edward N. Eadie, 2012-10-01 This book examines the contents, influence, and potential of a personal selection of modern books published over the last fifty years that have been relevant to improving welfare. The works selected comprise three earlier classics that mainly deal with animal experimentation and intensive farming, as well as five that concentrate on specific subject areas: namely, history, science, applied ethics, politics, and law, that are important to protecting the welfare of animals against suffering inflicted by humans. The books are arranged in the order of their publication date, and for each one, a few related works are also mentioned or discussed. This collection provides a broad understanding of animal protection issues and provides the necessary basis for an informed and comprehensive approach to improving the welfare of animals. The books selected have been influential, and they have the potential to improve animal welfare in the future.

The Oxford Handbook of Animal Studies Linda Kalof, 2017-02-01 Intellectual struggles with the animal question: how humans can rethink and reconfigure their relationships with other animals, first began to take hold in the 1970s. Over the next forty years, scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals. *The Oxford Handbook of Animal Studies* brings these diverse evaluations together for the first time, paying special attention to the commodification of animals, the degradation of the natural world, and a staggering loss of animal habitat and species extinction, and the increasing need for humans to coexist with other animals in urban, rural, and natural contexts. Linda Kalof maps these themes into the five major

categories that structure this volume Animals in the Landscape of Law Politics and Public Policy Animal Intentionality Agency and Reflexive Thinking Animals as Objects in Science Food Spectacle and Sport Animals in Cultural Representations and Animals in Ecosystems Written by international scholars with backgrounds in philosophy law history English art sociology geography archaeology environmental studies cultural studies and animal advocacy the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings
