Limpopo Doe November 2013:

The Political Economy of Global Warming Del Weston, 2014-04-11 Humanity is facing an unprecedented global catastrophe as a result of global warming This book examines the reasons why international agencies together with national governments are seemingly unable to provide real and binding solutions to the problems The reasons presented relate to the existing dominant global economic structure of capitalism as well as the fact that global warming is too often seen as an isolated problem rather than one of a suite of exceptional converging and accelerating crises arising from the global capitalist political economy This book adopts a political economy framework to address these issues It accepts the science of global warming but challenges the predominant politics and economics of global warming To illustrate the key issues involved the book draws on South Africa building on Samir Amin's thesis that the country represents a microcosm of the global political economy By taking a political economy approach the book provides a clear explanation of the deep and pervasive problem of the denial which fails to acknowledge global warming as a systemic rather than a market problem The book should be of interest to students and scholars researching climate change environmental politics environmental and ecological economics development studies and political economics

Renewable Energy Mansour Al Qubeissi, Ahmad El-Kharouf, Hakan Serhad Soyhan, 2020-09-09 The demand for secure affordable and clean energy is a priority call to humanity Challenges associated with conventional energy resources such as depletion of fossil fuels high costs and associated greenhouse gas emissions have stimulated interests in renewable energy resources For instance there have been clear gaps and rushed thoughts about replacing fossil fuel driven engines with electric vehicles without long term plans for energy security and recycling approaches This book aims to provide a clear vision to scientists industrialists and policy makers on renewable energy resources predicted challenges and emerging applications It can be used to help produce new technologies for sustainable connected and harvested energy A clear response to economic growth and clean environment demands is also illustrated

Transforming Energy Anthony Patt, 2015-07-16 Climate change will be an ecological and humanitarian catastrophe unless we move quickly to eliminate greenhouse gas emissions Policy experts advise us that we need to make major changes to our lifestyles and our governments need to agree globally binding treaties and implement market instruments like carbon taxes This advice is a mistake it treats technological innovation as being at the periphery of the climate policy challenge whereas it needs to be at its core we will phase out emissions when and only when the technologies to replace fossil fuels are good enough and policies need quickly to support these new technologies directly Anyone with an interest in climate change and energy policy will find this book forward thinking and invaluable Professional policy makers climate and energy policy researchers and students of energy and public policy economics political science environmental studies and geography will find this book especially stimulating

Handbook of Comparative Education Law: Selected Nations from Africa and the Americas Charles J. Russo, 2019-08-09 Each of the four volumes in this set as well as

each volume independently provide comparative analyses for researchers practitioners and students of the law and education in examining law and education in various countries around the world Designed to allow readers to learn from rather than copy the legal and educational systems in these volumes the books are designed to generate thought and conversation on how education can be improved around the world By having chapter authors leading academicians in the home countries follow the same template so it can be easier to compare similarities and differences thereby helping to make the book user friendly The value of these books is that they should help to enhance international awareness of the similarities and advantages associated with bringing together knowledge from various countries concerning education law Volume 4 encompassing Selected Nations in Africa and the Americas namely Brazil Canada Mauritius United States South Africa and Venezuela consists of detailed analysis of educational law and systems in these representative countries so researchers and students there and elsewhere can learn from one another

Recalibrating teacher training in African higher education institutions Sifiso Sibanda, Gideon (Deon) P. van Tonder, Washington T. Dudu, 2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimagined to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark
