

Self-
Review
2-1

DeCenzo Specialty Food and Beverage Company has been serving a cola drink with an additional flavoring, Cola-Plus, that is very popular among its customers. The company is interested in customer preferences for Cola-Plus versus Coca-Cola, Pepsi, and a lemon-lime beverage. They ask 100 randomly sampled customers to take a taste test and select the beverage they preferred most. The results are shown in the following table:

Beverage	Number
Cola-Plus	40
Coca-Cola	25
Pepsi	20
Lemon-Lime	15
Total	100

- Is the data qualitative or quantitative? Why?
- What is the table called? What does it show?
- Develop a bar chart to depict the information.
- Develop a pie chart using the relative frequencies.

2-1

- Qualitative data, because the customers' response to the taste test is the name of a beverage.
- Frequency table. It shows the number of people who prefer each beverage.
-

d.
