Linde Hydraulic Control (LHC)

**Digital electro-hydraulic controller**

Introduces a series of advanced features for the most control technology, through a hydraulic controller, a compact electronic controller equipped with a very powerful microcontroller performs all control functions for the drive unit and the working hydraulics (2).

**Adaptation to various trucks**

The electronic control unit is capable of controlling trucks from a variety of series and with different drive systems. To save fitting time, pre-wired kits are available, each with cable harness and a coding that uniquely identifies the truck.

**Troubleshooting**

The presence of the electronic control unit enables analogue and digital signals. The electronic reception digital signals and system errors, and displays an error message on the working instrument on the dash dashboard. In addition, the control unit accumulates a variety of messages according to the user's layout selected:

- Working light failure
- Reception failure of the external communication signal
- The mast tilts and counterbalance tilts and off the target zone
- The mast tilts in the emergency function, the external communication signal arrives off
- An error code appears on display

These functions can be activated by switching off the communication signal with the key switch. During a repair, the control unit stores whether the error is still present. If the error no longer persists, the truck returns normal operation. If the error persists, the error code message on the display will not be the message for the next start-up.

**Changing the controller**

**⚠ Attention**  
 Possible hydraulic component damage due to electrolytic discharge. Irreversible damage to working instruments will occur if the controller is changed.

The controller is equipped with a "float plug" which is attached to the back to avoid electrolysis. Communication cable pins are left out. The upper part number and the software version of the controller can be read out on the back inspection.

**⚠ Warning**

If the controller is replaced, the pre-wired cable unit controller must be identified and may adapted to the cable harness. All necessary information is available on the cable harness.
