

# How to write a research proposal?

You need a research proposal to explain what you are going to research, why it is essential, and how you are going to do this investigation.

Research proposal consists of a title page, introduction, literature review, a design of research, and a reference list.

## 1. Create a Title Page First

The title page here is similar to your dissertation. It contains the preliminary title of your paper, your full name, the full name of your supervisor, and the indication of your institution and/or department.

## 2. Write an Introduction

The first part of your proposal should include persuasive information about what you are going to do and why. So, introduce the topic, the context and background for your choice, a problem statement and research questions.

## 3. Literature Review Is Important

You need to prove that you are informed about everything that is going on in your field of studies. A strong literature review should convince your reader that you will contribute to the field on your own.

## 4. Define Your Methods and Research Design

This part needs to repeat the main objectives of your research.

Then, describe:

- ✓ the overall approaches;
- ✓ steps to achieve results;
- ✓ the type of research;
- ✓ the research design.

Then consider:

- ✓ the object of your studies;
- ✓ its subject and sources;
- ✓ where you will collect the necessary data;
- ✓ tools and methods for data collection;
- ✓ amount of time you will need for the practical part of your work;
- ✓ how you will access the sources;
- ✓ what potential obstacles you can encounter and overcome.

## 5. Explore and Indicate Your Project's Contribution to the Field

You need to show how much your project will contribute to the existing knowledge. For this, you can emphasize:

- ✓ making improvements in the field;
- ✓ strengthening a theory;
- ✓ developing new models;

## 6. Create a Reference List

Your research proposal will contain some important citations to support your ideas. So remember to include them in the reference list. Use a citation generator to make the process easier.

In addition, you can include the timeline and the budget of your research proposal.
