

Personal Philosophy on Advanced Practice Nursing and Healthcare

Introduction

Caring, which is a mainstay characteristic of nursing practice, has been christened as a complex process that is grounded on professional and ethical contexts. While examining the nursing ethos that safeguard the right of patients to human dignity, Judge-Ellis and Wilson (2017) identified caring as a primary moral obligation of the ethical frameworks underlying these ethos. I chose to become an advanced practice nurse because my demeanor and my disposition are adequately suited for providing this care.

Nursing philosophy is an integral element that helps in the identification of the approach that a nursing practitioner adopts towards delivering his or her professional obligations (Marchuk, 2014). The purpose of this paper is to outline my personal philosophy on advanced practice nursing and healthcare with respect to my future role as an advanced practice nurse. In this paper, my personal philosophy concepts that are specific to the nursing metaparadigms are established from published philosophies. Through evidence-based justification of theory, this paper explains how Peplau's Theory of Interpersonal Relations relates to my future practice nursing role and my personal philosophy. To provide ethical and compassionate care to the patients in a healing environment, there needs to be reciprocity between the nurses and the patients, as this is the bedrock of patient-centered treatment care.

Advanced Practice Nursing Philosophy

With the implementation of the Patient Protection and Affordable Care Act of 2010, more emphasis has been dedicated towards identifying the roles of healthcare professionals in guaranteeing the safety and safeguarding the rights of the patients (American Nurses Association, 2018).

How To Write A Nursing Philosophy Paper:

The Nurse as Executive Barbara Stevens Barnum, Karlene M. Kerfoot, 1995 This new edition of Aspen's bestselling book *The Nurse as Executive* has been thoroughly revised and updated to reflect the significant changes in nursing management. The nurse executive's role as a member of the executive team is examined as well as the nurse executive's role in health care issues such as quality outcomes, team building, and cost containment. Organizing the book around the new resource-driven management model rather than the goal-driven management model makes this book unique and distinguishes it from other management texts.

Creating a Caring Science Curriculum, Second Edition Marcia Hills, Jean Watson, Chantal Cara, 2021-01-07 The hallmark text for nursing faculty seeking to promote the transformative teaching of caring science. *Creating a Caring Science Curriculum: A Relational Emancipatory Pedagogy for Nursing* reflects the paramount scholarship of Caring Science educators. This second edition intertwines visionary thinking with blueprints, exemplars, and dynamic direction for the application of fundamental principles. It goes beyond the conventional by offering a model that serves as an emancipatory, ethical, philosophical, educational, and pedagogical learning guide for both teachers and students. Divided into five units, the text addresses the history of the caring curriculum revolution and its powerful presence within nursing. Unit I lays the foundation for a Caring Science curriculum. Unit II introduces intellectual and strategic blueprints for caring-based education, including action-oriented approaches for faculty-student relations, teaching-learning skills, pedagogical practices, critical-reflective-creative approaches to evolving human consciousness, and power-relation dynamics. Unit III addresses curriculum structure and design, the evolution of a caring-based college of nursing, caring in advanced practice education, and the development of caring consciousness in nurse leaders. It also features real-world exemplars of Caring Science curricula. Unit IV includes an alternative approach to clinical and course-based evaluation, and the text concludes with an exploration of the future of the Caring Science curriculum as a way of emancipating the human spirit. Each chapter is structured to maximize engagement with reflective exercises and learning activities that encourage the integration of theory and practice into the learning process.

New to This Edition: Updated chapters, case studies, and learning activities. Six new chapters that provide guidance on how to create a Caring Science curriculum. Exemplars from institutions that have developed Caring Science curricula. Key Features: Provides a broad application of Caring Science for teachers, students, and nursing leaders. Features case studies of teacher-student lived learning experiences within a caring, loving pedagogical environment. Encourages the integration of theory and practice into the learning process with learning activities and reflective exercises. Distills the expertise of world-renowned Caring Science scholars.
