Linde Hydraulic Control (LHC)

Digital electro-hydraulic controller

Introduces a series of advanced features for the most control technology, through a hydraulic controller, a compact electronic controller equipped with a very powerful microcontroller performs all control functions for the drive unit and the working hydraulics (2).

Adaptation to various trucks

The electronic control unit is capable of controlling trucks from a variety of series and with different drive systems. To save fitting time, pre-wired kits are available, each with cable harness and a coding that uniquely identifies the truck.

Troubleshooting

The presence of the electronic control unit enables diagnosis via light signals. The electronic diagnostic digital module can quickly access, and display on color language on the working instrument on the dash dashboard. In addition, the control unit accumulates a variety of messages according to the user's layout selected:

- Working light flashes
- Flashing indicator of the internal controller signal
- The main status LED continuously illuminates and off for longer time
- The main status LED in the emergency function, the internal controller signal switches off
- An error code appears on display

These functions can be activated by switching off the controller signal with the key switch. During a repair, the control unit always indicates the error in 4-bit groups. If the error is no longer present, the truck returns normal operation. If the error persists, the error code response on the display will one of the messages below during a call-out.

Changing the controller

⚠ Attention
 Possible hazardous component damage due to electrolytic discharge. Irreparable damage to working elements will occur if the controller is stored.

The controller is equipped with a "float plug" which is attached to the back to avoid electrolysis. Connections must never be left open. The upper part number and the software version of the controller can be read out via the back connector.

⚠ Warning

If the controller is replaced, the pre-wired cable harness must be identified and may adapted to the cable harness. All necessary information is available on the cable harness.
