for Bridge Element Inspection, 2011 The Guide Manual for Bridge Element Inspection builds on the element level condition
assessment methods developed in the AASHTO Guide for Commonly Recognized Structural Elements which it replaces
Improvements have been made to fully capture the condition of the elements by reconfiguring the element language to utilize
multiple distress paths within the defined condition states The multi path distress language provides the means to fully
incorporate all possible defects within the overall condition assessment of the element The overall condition of an element
can be utilized in this aggregate form or broken down into specific defects present as desired by the agency for Bridge
Management System BMS use The Bridge Element Inspection Manual provides a comprehensive set of bridge elements that
is designed to be flexible in nature to satisfy the needs of all agencies The complete set of elements capture the components
necessary for an agency to manage all aspects of the bridge inventory utilizing the full capability of a BMS Publisher s
