**Inorganic Chemistry Editor's Pick 2021** Luís D. Carlos,2021-06-24 Cognitive Sciences and Education in Non-WEIRD Populations Marcus Vinicius Alves,Roberta Ekuni,Maria Julia Hermida,Juan Valle-Lisboa,2022-08-27 This book aims to present theoretical and practical innovations in the cognitive sciences and education fields focusing on studies and research conducted with non WEIRD i e western educated industrialized rich and democratic populations especially from Latin America Cognitive sciences and neuroscience have increased exponentially their knowledge in the last three decades and today there is a corpus of knowledge about our central nervous system and its

functioning that adequately understood has promising contributions for the educational field. Most of this knowledge however comes from central countries North America Europe and is based on studies conducted on what has been called WEIRD populations. Much less is known about how the integration of cognitive sciences and neuroscience could impact education in non WEIRD populations which represent the great majority of the world's population and have quite diverse cultural and social characteristics. So the main aim of this book is to present a non WEIRD scientific approach to problems in the cognitive sciences neuroscience and education fields. Research presented in this contributed volume takes advantage of the diverse populations that characterize developing countries to explore how underrepresented populations learn what works and what does not for cognitive science and education not only for the developing world but also for understanding diversity in the whole world. Departing from this focus on diversity chapters in this book present studies on theories beliefs and misconceptions about the relationship between cognitive sciences and education child and adolescent cognitive development mathematics and language academic performance and cognitive interventions to improve educational practice. Cognitive Sciences and Education in Non WEIRD Populations A Latin American Perspective will be a useful resource for both cognitive scientists and educational researchers interested in developing a more culturally sensitive approach to basic and applied research on cognitive sciences of education.
