W. Dawson,2018-03-13 Previously artificial neural networks have been used to capture only the informal properties of music However cognitive scientist Michael Dawson found that by training artificial neural networks to make basic judgments concerning tonal music such as identifying the tonic of a scale or the quality of a musical chord the networks revealed formal musical properties that differ dramatically from those typically presented in music theory For example where Western music theory identifies twelve distinct notes or pitch classes trained artificial neural networks treat notes as if they belong to only three or four pitch classes a wildly different interpretation of the components of tonal music Intended to introduce readers to the use of artificial neural networks in the study of music this volume contains numerous case studies and research findings that address problems related to identifying scales keys classifying musical chords and learning jazz chord progressions A detailed analysis of the internal structure of trained networks could yield important contributions to the field of music cognition      *New York Math: Math B* ,2000      **Prentice Hall New York Math: Math B** ,2001      Financial Literacy Lessons And Activities, Grades 6-8 Evan-Moor Educational Publishers,2022-12-09 Help sixth seventh and eighth grade students learn about money with real world math activities hands on projects and reproducible play money Students explore real life choices related to paying bills earning money at a job saving for retirement and more      Computational Skills with Applications K.
