Violent First Contact in Venezuela Peter Hess, 2022-01-11 Published in 1557 Nikolaus Federmann's *Indianische Historia* is a fascinating narrative describing the German military commander's incursion into what is now Venezuela. Designed not only for classroom use but also for the use of scholars, this English translation is accompanied by a critical introduction that contextualizes Federmann's firsthand account within the broader Spanish colonial system. Having gained the rights to colonize Venezuela from the Spanish Crown in 1528, the Welser merchant house of Augsburg, Germany, sent mercenaries, settlers, and miners to set up colonial structures. The venture never turned a profit, and operations ceased in 1546 after two Welser officials were murdered. Federmann's text gives an account of his foray into the interior of Venezuela in 1530. It describes violent first contact with Indigenous peoples as well as Federmann's communication strategies, how he managed to prevail in hostile terrain, and how he related to other agents of the conquests. It also documents his unwavering belief in the intrinsic preeminence of European Christians and ultimately in the righteousness of his mission. The only detailed record of this incursion, Federmann's text adds a unique and important perspective to our understanding of first colonial contact on the Caribbean coast of South America. It provides insight into the first contact dynamic, the techniques of subjugation and dominance, and the web of diverging interests among stakeholders. This volume will be a valuable resource for courses and for scholarship on conquest and colonialism in Latin America.

Capitalism in the Anthropocene John Bellamy Foster, 2022-08-23 Over the last 11,700 years during which human civilization developed, the earth has existed within what geologists refer to as the Holocene Epoch. Now science is telling us that the Holocene Epoch in the geological time scale ended, replaced by the onset of a new, more dangerous Anthropocene Epoch which began around 1950. The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System, marking a changed reality in which human activities are now the main geological force impacting the earth as a whole, generating at the same time an existential crisis for the world's population. What caused this massive shift in the history of the earth? In this comprehensive study, John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest. The result is a planetary emergency that threatens all present and future generations, throwing into question the continuation of civilization and ultimately the very survival of humanity itself. Only by addressing the social aspects of the current planetary emergency, exploring the theoretical, historical, and practical dimensions of the capitalism's alteration of the planetary environment, is it possible to develop the ecological and social resources for a new journey of hope.
