

WRITING A PROCEDURE

Purpose

- To explain how to do something
- To explain how to get somewhere
- When a set of rules need to be understood

When to use a Procedural Text

- Writing instructions for a game or a process
- Writing a Recipe for a Meal
- Recording a Scientific Investigation
- Creating Rules for something
- Giving a set of directions

Enhance a Procedural Text by including simple pictures or diagrams.

Remember

- Keep your instructions short, simple and to the point
- Procedural texts are always written in **Present Tense**
- Procedures are presented from the **Second or Third Person Perspective**

PARTS OF A PROCEDURAL TEXT

Title

What is the goal or outcome of the activity?

Eg. How to Make a Banana & Fudge Sundae

Materials or Ingredients

What will we need to complete this activity? Be Specific, especially if you are writing a recipe. Use points or numbers. Include any special utensils or tools

Series of Steps

In order, list what needs to happen to complete your goal. In a recipe we refer to the steps as a **Method**. Start each instruction with an **Action Verb** such as shake or mix.

Conclusion

The conclusion is a short statement that may offer some specific tips or advice to make the task easier or more effective. It might even include safety warnings.

The Practice of Teachers Professional Development Helen Grimmer,2014-07-11 This book uses Vygotsky's cultural historical theory to provide a unique theorisation of teachers professional development as a practice A practice can be described as the socially structured actions set up to produce a product or service aimed at meeting a collective human need In this case collaborative interventionist work with teachers in two different Australian primary schools sought to simultaneously identify understand and develop the necessary conditions for supporting the teachers development as professionals The in depth analysis of this practice provides interesting insight into professional development for teachers at all levels of schooling and provides strong support for educational researchers administrators and consultants to reconsider many existing forms of professional learning development programs This book supports the contemporary view that professional learning must take place with teachers rather than be delivered to teachers but provides an important expansion to current work in this area by arguing that a focus on teachers learning of new strategies and principles may still fall short of creating long term change in teachers professional practice By taking a cultural historical approach the focus moves to supporting teachers development of unified concepts the intertwining of theoretical and practical aspects and motives to continue their ongoing development as professionals This emphasis builds teachers capacity to examine and disrupt habitual practices and understand create and implement thoughtful and sustainable transformations in all areas of their professional life This book therefore builds upon the ongoing conversation about professional learning and development offering a new framework for researching understanding and developing this critical practice

Converting STEM into STEAM Programs

Arthur J. Stewart,Michael P. Mueller,Deborah J. Tippins,2020-02-27 This book examines the push and pull of factors contributing to and constraining conversion of STEM science technology engineering and math education programs into STEAM science technology engineering math and arts education programs The chapters in this book offer thought provoking examples theory and suggestions about the advantages methods and challenges involved in making STEM to STEAM conversions at levels ranging from K12 through graduate university programs A large driving force for STEM to STEAM conversions is the emerging awareness that the scientific workforce finds itself less than ideally prepared when engaging with so called wicked problems the complex suite of emerging multifaceted issues such as global climate change social injustice and pandemic diseases Dealing with these issues requires cross disciplinary expertise and the ability to insert technical and scientific understanding effectively into areas of public planning and policy The different models and possibilities for STEAM as the next phase of the STEM revolution laid out in this book will promote research and further our understanding of STEAM as a forward thinking approach to education Gillian Roehrig STEM Education University of Minnesota USA The ideal teacher sees opportunities for integrating ideas from multiple disciplines into every lesson This

book offers many worthwhile suggestions on how to do that deliberately and systematically George DeBoer Project 2061 of the American Association for the Advancement of Science USA For the last several years calls for expanding STEM education have grown but so too have concerns about technocratic approaches to STEM This volume challenges the community to consider broader views on STEM by focusing on the place of arts education within this movement The chapters offer much needed new perspectives on the re integration of the arts and sciences Troy Sadler School of Education University of North Carolina USA
