Solutions of Transport Systems for Growing Mobility Grzegorz Sierpiński, 2017-07-11 What are the parameters that should be taken into account in an advanced simulation model designed for a transport system that promotes green travelling

policies How can the goal of modal shift be pursued through ICT solutions Is it enough to apply only a single criterion when planning transport systems What is the importance of information acquisition and provision in Intelligent Transport Systems Answers to these and many other questions can be found in this publication It also contains numerous analyses based on relevant data sets illustrating the close relationship between ITS and the changes observed in terms of how specific means of transport are used What proves to be particularly important for advanced transport systems is the use of environmentally friendly solutions that reduce their negative environmental impacts accordingly the book also addresses this aspect With regard to the research results discussed and the selected solutions applied the book primarily addresses the needs of three target groups Scientists and researchers ITS field Local authorities responsible for transport systems at the urban and regional level Representatives of business traffic strategy management and industry manufacturers of ITS components

Advanced Solutions of Transport Systems for Growing Mobility gathers selected papers presented at the 14th Transport Systems Theory and Practice Scientific and Technical Conference organized by the Department of Transport Systems and Traffic Engineering at the Faculty of Transport of the Silesian University of Technology The conference was held on 18-20 September 2017 in Katowice Poland More details at www.TSTP.polsl.pl

PRODUCTION PLANNING AND CONTROL

MUKHOPADHYAY, S. K., 2015-02-26 This comprehensive and up to date text now in its Third Edition describes how the latest techniques in production planning and control are applied to contemporary industrial setups so as to meet the ever increasing demands in industrial organizations for better quality of services for faster delivery of products and for adapting to the rapid changes taking place in the industrial scenario With the demands in the industrial arena increasingly tending to be lumpy the most effective strategy for planning and controlling production processes cannot be a static preconceived one Instead it is one that is flexible and is capable of adapting to the erratic changes in demand patterns Evolving such a strategy requires more of practical skill than mere theoretical knowledge of the subject This book explores the demands of the present day industrial environment and the techniques for addressing these demands through a number of case studies drawn from Indian industries The efficacy of various planning strategies the methods for implementing them and their suitability for different industries have been clearly explained in relation to these cases While the essentials of theory have been covered in a simple and straightforward style the stress is on developing the practical skills required to tackle the unpredictable problems and the unforeseen demands that pose a formidable challenge to modern industries The book places emphasis as much on the principles of heuristic techniques as on the systematic approach to production planning This book would serve as a useful textbook to postgraduate students of management as well as undergraduate students of industrial engineering It will be equally useful to the teaching community and the practicing professionals

NEW TO THE THIRD EDITION Includes a new chapter on Leagile Manufacturing A Contemporary Manufacturing Syndrome Chapter 11 Provides several references to explore more in the field

KEY FEATURES Gives solved problems that serve as numerical illustrations of

the theoretical concepts The Case Studies given focus on the Indian scenario these will be of great practical value to students and professionals alike Offers substantial coverage of the modern heuristic methods the Kanban system and the ERP techniques
