English in the Indian Diaspora Marianne Hundt, Devyani Sharma, 2014-08-15 Diasporic populations offer unique opportunities for the study of language variation and change This volume is the first collection of sociolinguistic studies of English use across the historically complex and widely dispersed Indian diaspora The contributions describe particular sociohistorical contexts the UK Fiji South Africa Singapore and the Caribbean and then use this rich empirical base to examine diverse questions in theory and method such as the extent to which different settings see different or similar linguistic outcomes the role of community structures transnational ties attitudes and identity reasons for differing rates of change adaptation and focussing and the relevance of endonormative stabilization of Asian Englishes These themes do not simply further our understandings of diaspora They can ultimately feed into wider theoretical questions in language

Fitness Costs and Benefits of Female Song Michelle L. Hall, Naomi E. Langmore, 2017-09-11 Bird song traditionally regarded as primarily a male trait is in fact widespread among female songbirds and was probably present in the ancestor of modern songbirds Odom et al 2014 Nature Communications These recent findings challenge the view that sexual dimorphism in the expression and complexity of song is largely the outcome of sexual selection on males It is now clear that understanding the evolution of bird song requires explaining variation within and among species in the expression and complexity of female song To do this we need a better understanding of the nature of variation in female song in different contexts and systems as well as the fitness costs and benefits of variation in the expression and complexity of female song This Research Topic draws together current research on female song with the goal of understanding the fitness costs and benefits of the diversity of female singing behaviour apparent among songbirds It includes articles ranging from single species studies investigating how female song varies with context and contrasts with male song to comparative analyses exploring relationships between female song and ecological social and other factors as well as opinion pieces
